

9 December 1981

Office of Environmental Medicine  
Room 848, Veterans Administration  
810 Vermont Ave., N.W.  
Washington, D.C. 20420

Sirs:

Request that you send me a copy of the report, "Review of Literature on Herbicides, Including Phenoxy Herbicides and Associated Dioxins." I am presently engaged in writing the history of the defoliation operation in Vietnam, and in preparing a paper on herbicides operations to be given at a conference this spring. I am also the historian for the Ranch Hand Vietnam Association, an organization of veterans who flew with the spray organization in Vietnam. These volumes will become a permanent part of the Ranch Hand History Project Archives at Texas A&M University.

Unless previously distributed under the government documents depository system, I would like a second copy of the publication for the University Library/Medical Library bookshelves.

Thank you very much,

Respectfully,

Paul F. Cecil  
Director, Ranch Hand History Project
