

UC-123 flew 100-150 ft agl  
at 130 KIAS - increased to  
140 KIAS after installation  
of improved A/A 454-1 dispenser  
system in mid-1966

Need below 85°F  
below 10 k wind  
no precip for 2 hrs

run was 4+ minutes

14 kilometers with swath  
of 300 feet

AF PACAF

M-38245-47a-5

pgs xii-xiii

Don't mix Blue & White  
because it makes a precipitate  
that fouls nozzles, etc.
