Good afternoon Mr. Cecil,

I am attaching a batch of abstracts to show you what we have. I believe all the histories/reports, etc., will be here, but it is possible there are copies in other areas. For instance, the command often has at least the microfilm copies.

We would not have gotten any "base closure" materials, but we should have had all histories prior to/in conjunction with the closure. It is possible there were other items sent to W-P, such as local reports or records that didn't make it into the histories. I will send this to a historian friend at AFMC history office and see what he thinks. I'll let you know what he says.

If any of these look promising and I can look at something for you, let me know.

My best,

anne

Dear Ms OConner:

My studies have led me in another direction that you may be able to help me with. In about 1965 the San Antonio Air Material Command at Kelly AFB was given responsibility for herbicide procurement. Later, about 1980, they produced a report on their activities in this regard. The base closed in 1991 and the commands have changed names. I am trying to determine where their records and historical reports would have been deposited. I will be in the area of Wright- Patterson AFB later this fall and will check there, but I am wondering if any of the materials were sent to Maxwell, either as command records or under the Wing or Base titles. I would appreciate any assistance in locating these items, or any suggestions you might have as to where I should look.

Thanks for you time,

Paul F. Cecil, Historian, RANCH HAND Vietnam Association.
