

This is a listing of firebases, landing zones, special forces camps, and other US combat sites in the RVN AO. It is not all-inclusive nor could it ever be. The intent is to catalogue locales where US and some allied combat (grunt) troops might have set foot, and that subset alone contains almost 7,000 entries. I know many brothers/sisters served in other, officially "non-combat" job descriptions, who knew combat just as well. I intend no slight to any USN, USCG, RRS, CE's, or other's not specifically noted here. If you want to see everything I've accumulated, take a look at the GoogleEarth file mentioned later and, better yet, Don Smith's file. The data are from "Where We Were in Vietnam: A Comprehensive Guide to the Firebases, Military Installations and Naval Vessels of the Vietnam War, 1945-1975," Michael P. Kelley, Hellgate Press (June 1, 2002), ISBN-10: 1555716253, [R. J. Smith](#), who has devoted years to selfless research, and [Don "Sgt. Snuffy" Smith](#), who has compiled an extensive and probably the most complete database available, and available AAR's, ORLL's, and other documents. Firebase or LZ? If I can document arty on the ground, I call it a firebase. Lat/Long coordinates are datum WGS84. Numerals in blue underline after the text are hyperlinks to online resources, simply click to launch your web browser at that address. This document is an ongoing effort and is current as of [12/06/13](#).

These locales and many more (airfields, heliports, naval installations, hills and other geographic features, bridges, etc.) are available as a .kml file, viewable in GoogleEarth, a free application showing points plotted against medium to high resolution satellite photography with lat/long resolution. I will email this file to anyone interested and help with its use.

I welcome any feedback regarding additions, corrections, and commentary relating to particular sites. It will be incorporated into this document.

Bill Kindred
