

TABLE OF ORGANIZATION) HEADQUARTERS
AND EQUIPMENT) UNITED STATES ARMY COMBAT DEVELOPMENTS COMMAND
NO. 67T (Tentative) Fort Belvoir, Virginia, 10 July 1965

AIRMOBILE DIVISION

Designation: _____ Airmobile Division

Section		Page
I.	General:	
	Organization -----	1
	Equipment -----	3
	Special Instructions -----	4
II.	Organization (Personnel):	
	When organized as an Airmobile Division	
	Distribution -----	5
	Recapitulation -----	6
	When organized as an Airmobile Division with one Airborne Brigade Capability.	
	Distribution -----	28
	Recapitulation -----	29
III.	Equipment:	
	Recapitulation -----	53

SECTION I

GENERAL

ORGANIZATION

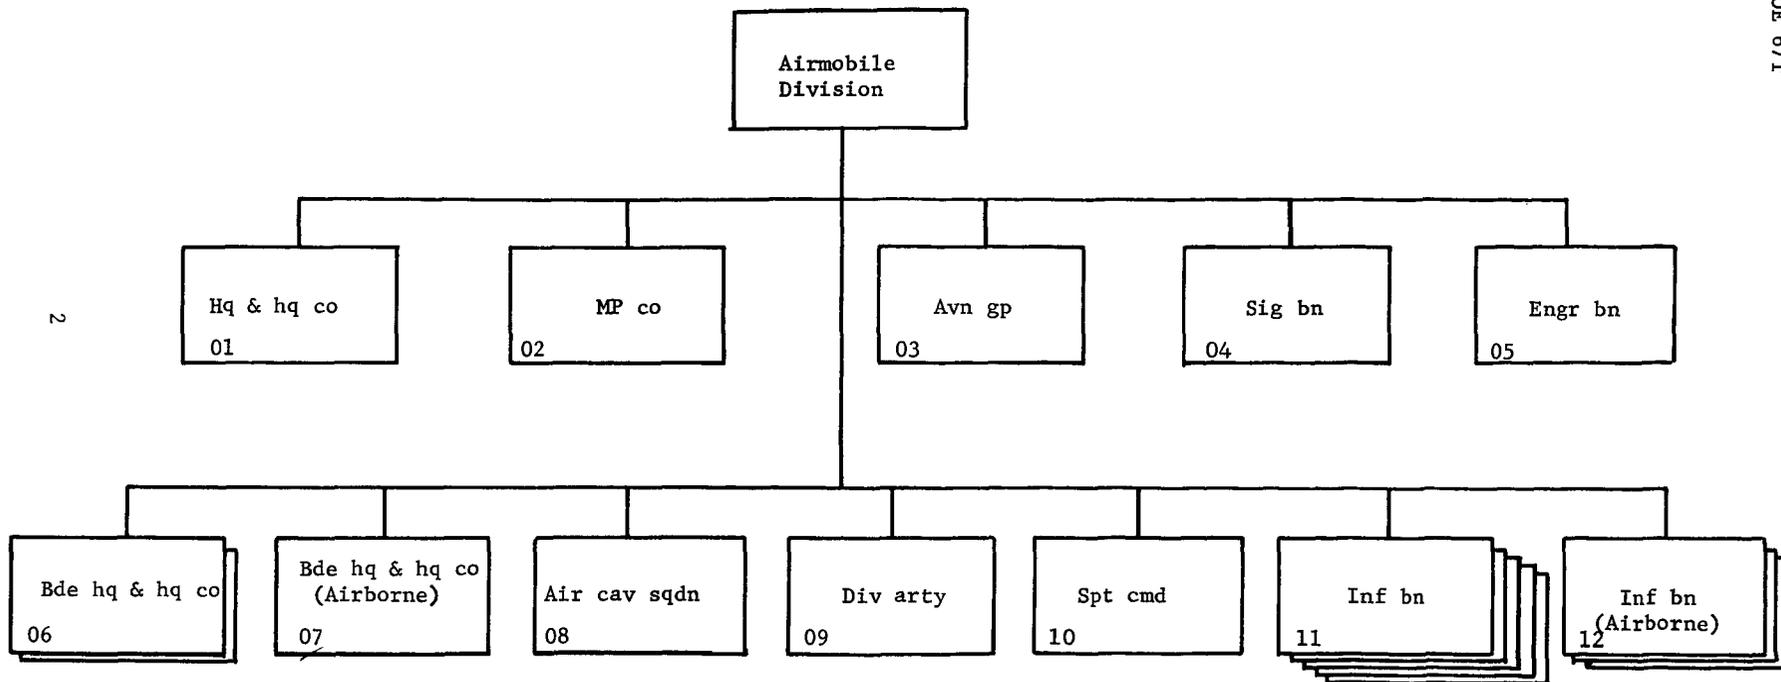

1. MISSION. The mission of the airmobile division is to provide reconnaissance and security for larger units, to participate in stability, low and mid-intensity operations, and to control an area including its population and resources.

2. ASSIGNMENT. To field army, corps or separate task force.

3. CAPABILITY. a. The division is capable of conducting operations in all types of terrain. It is characterized by the ability to respond immediately and to maneuver rapidly over large areas. It can reconnoiter, screen wide fronts, delay and, on a selective basis, conduct

*This TOE is tentative and is for test purposes only. Units will be organized under this table only when specifically directed. This table supersedes TOE 67T, 22 June 1965.

AIRMOBILE DIVISION

2

TOE 67T

raids in the enemy rear. The division is capable of re-cycling combat forces for immediate use in other areas by vertical entry and recovery of units into and from the battlefield. The division can be introduced into combat so that the mass and intensity of the division attack can be applied promptly against the enemy, thereby changing the tempo of a single engagement, the frequency with which engagements are possible, and the range of terrain over which combat actions can be initiated. The airmobile division can locate and maintain contact with the enemy or maintain contact between other friendly forces, and counter hostile airmobile, airborne and irregular forces. In an unsophisticated or semi-sophisticated environment, the division can project its influence rapidly by using its increased mobility and firepower to gain and maintain control over land areas.

b. The reduced strength column adapts this table of organization and equipment to the lesser requirements for personnel and equipment during prolonged noncombat periods and for a limited period of combat.

c. This unit is not adaptable to a type B organization.

d. Individuals of this organization, except chaplains and medical personnel, can engage in effective, coordinated defense of the unit's area or installation.

e. Units of the division organized under TOE 67-42, 7-55, 6-705, 5-215, 19-87, 11-207, 1-101 and 29-41 have personnel designated with which to form an Airborne Brigade. The Division Commander may designate 42 additional personnel as parachutists from units of the division to provide the necessary command and control personnel for the Airborne Brigade.

4. BASIS OF ALLOCATION. To field army, corps or separate task force in conformity with operational environment requirements determined by Department of the Army and theater commanders.

5. CATEGORY. For category designation of the components of this division, see SECTION I, GENERAL, ORGANIZATION, of each appropriate TOE.

6. MOBILITY. For mobility of the components of this division, see SECTION I, GENERAL, ORGANIZATION of each appropriate TOE.

EQUIPMENT

7. Equipment recapitulation indicates the basic requirements only. For variations and/or specific authorizations of components of

TOE 67T

this organization, see section III of the tables of organization and equipment shown under section II of this table.

8. In accordance with pertinent Department of the Army and/or theater documents, units are authorized the following (definition of terms in accordance with AR 320-5 as amplified by SB 38-26):

- a. Basic Load.
- b. Prescribed Load.

SPECIAL INSTRUCTIONS

9. In accordance with ARs 310-31 and 310-44, recommendations for changes may be submitted directly to Headquarters, United States Army Combat Developments Command, through command channels (except overseas commands who will submit recommended changes to the Assistant Chief of Staff for Force Development, Department of the Army, Washington, D. C. 20310). Emphasis will be placed on recommending changes designed to effect the most efficient and economical use of personnel and equipment.
