14. Dept. of Defense: DIA Live Sighting Reports 95 bx  
Arranged by DIA Live Sighting Source Numbers.  
[also see Wick Tourison files, box 4 & 5 for list]  
The records consist of the declassified documents of live sighting reports delivered to the Select Committee in partial compliance with the Senate's request to the President.  
To protect the identity of sources their names were excised by DIA, and the cases were referred to by a Source Number. In many instances sources provided more than one account, and the DIA assigned other numbers to these subsidiary reports. The main body of DIA live sighting reports consists of reports numbered from 1 to 15,313 (bx 1-91) and bx 92-95 contain lists and indexes to the files. Nine-hundred and twenty-eight of the reports were

removed from this series for use in the "Cluster Map" project, and filed in a separate series. These reports are filed in the series "Dept. of Defense: Defense Intelligence Agency: Declassified Live Sighting Reports used in Select Committee Cluster Analysis", and are arranged by geographical location according to a grid system imposed over the map of Vietnam.

Boxes 1-91 contain live sighting reports, box 92 contains various printouts of indexes and administrative documents, box 93 contains a three part report from DIA on Sightings of US Prisoners by Indochinese Refugees and boxes 94 and 95 contain live sighting files from the Joint Casualty Resolution Center (JCRC).

There are three indexes to the live sighting files. The indexes list the live sighting: 1) by Source Number, 2) by date of sighting, and, 3) by location of sighting.

The index entries contain data from the SI Report data base used by the Defense Intelligence Agency as one of its information management systems. The entries start with the Source Number or case number (CASENO), indicate whether the report was POW or MIA and FirstHand or Hearsay (SIGHT), provide a brief description of the contents of the report (REPORTED INFORMATION), list the date of sighting (DOS) if available, give latitude (LAT) and longitude (LONG), have an unidentified column (UTM), tell the country involved (CNTRY), indicate which agency originated the report (ORGIN - there is a symbol list attached), a status report column (POLY CAT), and the disposition of the case(IAC COMMENTS).

On the index to live sightings by location, the first line on the top of the pages show the coordinates for the sightings such as "FILE SEARCH WAS BASED ON CENTER POINT OF 205800N 1054600E FOR 25 KILOMETERS" and in most cases the location is hand-written alongside as "HA DONG." The locations indexed are Ben Nape, Ha Dong, Hai Phong, Hanoi, Hoa Bin, Hon Gai, Hon Gai (other coordinates), Hon Gai (other coordinates), Loa Cai, Mahaxai, Muong Khoua, Muong Ngoy, Muong Sai, Nho Quan, Noug Het, Pleiku, Sam Neua, Sonla, and Tehepoh.

The live sighting reports from the JCRC are arranged by geographical area. They were numbered by the Senate Security Office. Some of these sightings are also in the DIA system and may have DIA numbers, but others are not in that system.

15. Dept. of Defense: DIA Live Sighting Reports by Location

40 bx

The records consist of live sighting reports which were removed from the original series of DIA live sighting reports, for use in the cluster map analysis project. Each box contains live sightings from one or more grid segments, and a map of Vietnam with the segments highlighted. A box list showing the grid segments in each box is in the NSC finding aids.

1 bx

Arranged by country and report number.

The records consist of six groups of CIA POW/MIA intelligence reports: three each on Laos and Vietnam and numbered 315, 316, 317. An index showing report number and date of promulgation precedes each group.

17. Senate Foreign Relations Committee, Minority Staff, Tracy Usry Files.

29 bx

Arranged in ten numbered "file groups", and within each file group alphabetically. There is a document list and name index in box 1.

The records are arranged in folders under the names of various individuals, organizations, reports, and subjects. The document list includes both the folder title and descriptions of many of the documents within the folders. The index to the documents list indexes the documents within the folders that appear on the list.

The series contains a wide range of materials, including letters, interviews, memoranda, issue papers, speeches, news clippings, cables, telegrams, printouts, testimony and reports. Several of the reports in box 1 relate to the history of the POW/MIA issue: "POW/MIA Memoranda Listing Indexes to all Congressional Testimony on POW/MIA Since 1971"; "Significant Documents Relating to the POW/MIA Committee"; and, "Review of U.S. Policy Toward POW/MIAs by Republican Staff of Senate Foreign Relations."

Arranged in binders as described below.  
Paul B. Whipkey disappeared while in the Army in 1957 and it was believed that he had left his car, wandered into the desert and died, and that the shifting sands covered his body. His brother Carl Whipkey collected a file on the disappearance and asked to be deposed to testify before the committee and turn over a copy of his file [Holstine files box 1]. The records in these boxes include the files Carl Whipkey collected.

The records consist of materials presented to the Select Committee by Carl Whipkey: 1) a binder of exhibits identified in two parts as # A through # D5 and #1 through 53 (both parts are prefaced by a documents list); 2) a binder containing FBI file 42-141960-26 on the Paul Whipkey disappearance; 3) a binder labeled "Lt. Paul B. Whipkey: 1983 to 1992 problems with GI insurance, Death Gratuities, Senator Heinz, Spector, Kerry POW/MIA Committee & Synopsis"; 4) testimony before a 1982 Army Board for Correction of Military Records in the case of Paul Whipkey; and, 5) a folder of newspaper stories about Whipkey.

Records relating to the Whipkey case may be located among other records of the committee. Box 6 of the records of committee investigator Jon Holstine contains a file on this case.

Arranged chronologically 1965-1992, and thereafter miscellaneous papers.

The records are related to Marine Pfc. Robert Garwood, who in 1984 claimed that his travels in Vietnam gave him reason to believe that at least 70 U.S. servicemen were still being held prisoner in that country. The bulk of the records are the declassified records relating to Garwood's military career arranged in annual folders from 1965 through 1992. The records include Garwood's military records, newspaper and magazine clippings, and other related material (boxes 1-5). Additional records, including copies of press clippings, correspondence, statistical analyses, debriefing transcripts, and transcripts of Vietnamese communist propaganda radio are filed in boxes 5-7.
