After reading your add in Flying Magazine it occurred to me I have some information which could be of some value to your organization.

My Uncle, Harry Tansen, flew Huey's in Viet Nam for the NAVY in both Attack and Rescue Roles. My best guess as to when would put him over there in 1969 or so, and I've heard he served several tours. One story I remember as a child was of one of his crew being killed by ground fire, so he must have been in the thick of things.

Harry passed away in 1980 or 1981. After the war he returned home, moved to Montana, married, had two kids, ~~and~~ and I think he tried farming or raising Christmas trees or something. He became obese, suffered a heart attack in the mid 80's, then died of a brain tumor.

I hope this info is of some value.
