M E S S A G E

Roger, I am also FAXing this note on to Greg.

Attached is the cover letter I would place on top of the 3
Constitution and Bylaws documents in the Registration packets. I
finished the final copies of each this AM. The "Change Log" had
to be corrected to agree with the final Council approved version
of the PROPOSED DRAFT. I tried to write the cover letter with a
professional yet warm and encouraging style. I suggest that we
have all Council members sign the cover letter. This will
clearly show we have all approved the PROPOSED DRAFT and this
will encourage the membership to do likewise. Suggestions ...
comments ... criticisms ... gripes ... complaints?

I will bring the originals of the 3 docs plus the cover letter to
Chicago. I will have to adjust them to 8 1/2 x 11 sized paper and
have them copied in Chicago. The packet is: cover letter - 1
page, 1 sheet; existing C&B - 4 pages, 2 sheets; change log - 2
pages, 1 sheet; proposed draft - 5 pages, 3 sheets. NOTE I PLAN
TO COPY DOUBLE SIDED TO SAVE MONEY and paper. I'd guess it will
cost 7 cents a sheet (or 49 cents per packet); so if we have 500
pilots at the Reunion that will cost $250. Greg can one of your
local committee members make some calls to some local copier
places and make some recommendations for which one we should use?
Else, I will just "select one" and it might not be the best or
cheapest.

FYI, I called the Computer Rental place. The gear (with paper)
is on firm order to be delivered to my room at the Hyatt on
Tuesday and to be picked up Monday...charged to my VISA card,
cost $683.70.

Greg, is there any way I can meet you Saturday afternoon/evening
when I arrive / or pick up a copy of the preregistrants at the
Hyatt? We will be tired and want to get to the hotel and get
some sleep; but I'll be up (I always am) at 2 or 3 a.m. the next
morning. I want to start building the IBM version of the data
base at that time. I want to work on it and get is right on
Sunday before I fly out to Wichita. Suggestions?
