

December 27, 1994

Dear Mike,

Here are copies of the Chinook patches that I have been working on. After several tries at exporting the graphic files I find the best method for me is to paste the graphics in to a MS-Word document.

Please let me know if the enclosed graphics are satisfactory for your use or if any changes need to be made.

I am running low on good CH-47 Unit patch material, could use some help here. The copy of the 179th patch that you sent was most helpful.

Thanks for the copy of the ALDUS magazine. I found the article on the airplane illustrator most interesting. This guy is a professional graphics designer and his skills are light years ahead of mine. Some of his techniques that were described inspired me to try different approaches to some projects in the future.

Happy New Year,

*Jay*
