I want to tell you a personal story, 26 years ago I received a care package marked "any soldier Vietnam", a Mr. Healy from Time Life sent this package. Just knowing we were not forgotten was a big moral buster.

I want you to hear this story about women service personnel assigned Bosina.

They got separated from their personal gear, when some folks back in the States heard about this, they put together small CARE packages with cosmetics, these ladies said when they received them, they felt like they got their dignity back.

I know there are 20,000 stories for each assigned person, these gifts go a long way in the hearts and minds of our service people.

Thank you for Generous GIFT.
