

Hi Mike,

14 Mar 98

Here is my first (actually second I screwed up the first) CD-ROM. It has the initial 2.7 million Vietnam service database (more to come).

The ~~zip~~ file contains the Heliopt & KIAMAIN databases.

I ran out of space to put them on without being zipped. My plan is to have these CD-ROMs become a periodic archive.

The VHPAX is not finished. I will be adding the fields we discussed recently.

~~The~~ I have ordered the FoxPro distribution kit. (need it for Corning job). My plan is to put an executable on a CD-ROM that will search the databases.

Gary
