Mike Law

October 19, 1995

Dear Mike;

Thanks so much for the 1996 calendar, it is absolutely fantastic! I realize that my opinion may be skewed somewhat by the fact that one of my paintings is on the front, but the whole thing is absolutely first class. The glossy finish and crispness of everything offers a thoroughly professional presentation. Any concerns that I may have expressed about my artwork losing detail or color in the publication process have been nullified. In fact the calendar renditions look better than the originals (that's between you and I).

*I agree that the larger format may be preferable, but considering how close we came to not having a calendar at all, you won't be getting any complaints from me. The pocket patches and additional lettering and graphics are a nice touch, I think that they add to the overall presentation. I think it was wise to delete the dedication information for '96 due to the smaller overall format. You might consider putting it in every third year or so. The narratives are very well written, and I am very pleased with the wording on the ones for my two paintings.*

I hope the calendar project is able to continue. I will continue to submit artwork for you to use at your discretion. I am finishing up my UH-1C print now, and will probably follow it up with a USMC CH-34. Many thanks for the check, I will use it to buy more calendars!

Again, thanks for the tremendous exposure and fantastic presentation that this will give my artwork. I look forward to sharing your table at the next reunion.

Sincerely,

Joe Kline
