SOI ITEM 21-1 TEL & RATEL
AUTHENTICATION

AUTHENTICATION SYSTEM

1. Test elements for transmission authentication. This is RISKER
 2. What is authentication of MIKE ECHO?
 2. Reply elements for transmission authentication.
 - a. Locate letter/character in left hand column (M-ike).
 - b. Locate second letter/character in row corresponding to that designated by the first letter. Correct reply when using this table will contain the letter immediately before and the letter immediately following the second test element. In the event the second test element is the first or last letter in a row, use the letter on the opposite end for the appropriate reply. (Example: Second element is last letter in row. Reply would be next to last letter and the first letter of the row).
 - c. Example: This is RISKER 21. Authentication is CHARLIE MIKE (ref. example 1 above).
- Authentication table on reverse side.

April 1969

The following changes and additions are made to the Pocket Size Combat Avn Bn SOP:

1. Change - Paragraph 2. Altitudes (Night), Inclosure 1 (TAC-1 Access Route) to Appendix VII (TAC-1 Operations) to Annex F (Administrative) of the Pocket SOP (Page 40) change to read as follows:

a. Lowe AHP enroute to TAC-1. From Lowe AHP to New Brockton 1200' indicated (weather condition ALPHA), 800' indicated (weather condition BRAVO). All aircraft cross ACP Juliet at 800' inbound.

b. TAC-1 enroute to Lowe AHP. All aircraft cross ACP Juliet at 1000' outbound. New Brockton to Steep Head Creek and Highway 27 1200' indicated (weather condition ALPHA); 800' indicated (weather condition BRAVO). From Steep Head Creek and Highway 27 descend to, or maintain 800' indicated for Lowe AHP traffic pattern.

c. Communication procedures for crossing ACP Juliet.

NOTE: (No Change)

EXAMPLE: (No Change)

2. Add - To paragraph 4, Appendix 1 (Safety) to Annex F (Administrative) of the Pocket Size Combat Avn Bn SOP (Page 26):

1. Communication requirements for landing at tac sites.

DAY: Do not land at an authorized landing site unless the student pilot is able to establish and maintain from the initial call until the aircraft is on the ground positive 2-way radio communication with that site or during a combat assault with the command and control aircraft.

NIGHT: Do not land at an authorized landing site unless the student pilot is able to establish and maintain from the initial call until the aircraft is on the ground positive 2-way radio communication with that site.
