

UH-1 IPC/MOI REGULATION QUESTIONS

Par 74 Pg 23

or Air 1/2 m. clear of clods
A/S To Provide for Avoidance

AR 95-1
Pg 4-8
Tab 4-1

1. What are the basic VFR minimums for Army helicopters in noncontrolled airspace below 1200 feet? Day Flat Day MTH. Night FLAT Night MTH.
300 1/2 m. 500 1/2 m. 500 1 m. 1000 1 m.
2. What is the cloud clearance and visibility required when operating in controlled airspace below 10,000 ft MSL? 3 SM. 500' below 2000' Hov. 1000' Above
PG 23 Air Par. 74
3. What is the VFR fuel reserve for Army aircraft? 30 min at Normal Cruise
Para. 4-2 Pg 4-1 AR 95-1
4. What is an appropriate cruising altitude when operating VFR above 3000 ft AGL on a heading of 185 degrees and tracking 178 degrees? 3500' Ref. AIM Pg 22 or GP Pg 6-7
IFR Sup EL VFR Sup
5. What is the required equipment for night VFR in Army aircraft? Fuel gage X Ponder if Re
6. What is the weather briefing void time for night VFR in Army aircraft? GMT + 1 1/2 hrs
AR 95-1 Para 4-17 A/S indic. Altimeter Mag Hdg indic w/ Card Alchite Sys Land Sch
7. What is ATIS and where can it be found?
8. At what airports are Army aircraft authorized to land?
9. How close may an aircraft be taxied to an active runway?
10. How long may an Army aircraft not equipped for IFR operate over the top?
11. What weather must be forecast before an Army aircraft may be cleared VFR?
12. List two reference sources where you can obtain pilot to METRO frequencies.
13. What AR governs weight and balance for Army aircraft?
14. What action will be taken when an emergency or other special circumstance requires a pilot to deviate from the rules set forth in the AR's and FAR's?
15. What publication can be used to determine if a proposed area of operation is considered to be flat or mountainous terrain?
16. What does an alternating red and green light from a tower mean to a pilot?
17. Describe an airport traffic area. Describe a control zone.
18. List the proper sequence of information required for a VFR position report. How often must a report be given and to whom?

DAILY

cc

19. List the following transponder codes:

a. Emergency b. Lost Commo c. VFR
7700 7600 1200

20. How often are scheduled weather broadcasts given over navigational aids and for how large an area?

21. What is the 365F and how often must it be updated (Class I)?

22. When will the anti-collision be turned on? Off?

23. What ceiling, visibility, and cloud clearance must exist in order to file VFR from a control zone? 1000 3

24. Flying time for aerial flight in a helicopter starts when? Stops when? T/G Rotor blade S2.p2

25. What items will the aviator include in his passenger and crewmember briefing?

95-1 26. What is the official document governing the operation of the aircraft and the basis for standardization throughout the Army? - 10

27. What actions in the checklist are to be completed by memory?

28. What publication contains a section on medical facts for pilots?

29. What qualifications must an aviator meet in order to be awarded an IP designation?

30. What regulation governs accident investigation?

31. When may passengers not fly in Army aircraft?

32. Who has the right-of-way when two or more aircraft are approaching an airport for landing?

33. When will the annual aviator proficiency and readiness test be given? ANN

34. What are the safety rules reference smoking?

35. May a pilot of a helicopter depart the helicopter with the engine running? Yes if The Controls are frictional closed

36. What is a temporary landing area?

37. What does the flying symbol UT mean and what duties may be performed. UNIT Training
