Infiltration routes: from the sea, at the BINH DINH and QUANG NGAI Border, Northwest up the valley. Along the SONG AN LAO close to the BINH DINH Border, Southeast down the valley.
 AA Wpons: are numerous near proposed Bde CP location.

b. Enemy Capabilities:

- (1) Attack: VC/PAVN forces can attack the FSE or Sqdn CP with up to four Bns, assisted by several LF Cos and platoons within 24 hours after start of operations. Within 48 hours that force can be reinforced by two regiments, (18th PAVN & 2nd MF)
- (2) Defend: VC/PAVN units can defend in place with up to four Battalions supported by several LF units initially, and reinforce (conducting counterattack from another direction) with two Regiments supported by LF units.
- (3) Reinforce: If VC/PAVN Hqs considers the control of Northern BINH DINH Province vital to their interests they could reinforce in the area with all units listed in para a (1) above.

Annex A (Intelligence) to 1/9 Cav OPORD 1-66 OPERATION MASHAN (U)

(4) Withdraw: If warned of forthcoming operations he can withdraw to hill masses immediately, or within 24 hours after start of operations. The withdrawal can be covered by local forces conducting diversions.

(5) Ambush LZ's with 1 Bn.

c. Possible courses of action:

- (1) It is not probable that VC/PAVN Bns will defend their present positions unless trapped - nor will they defend terrain features nor remain in villages to conduct a defense.
- (2) Most likely, they will withdraw to locations on high ground, conduct extensive reconnaissance to determine our disposition of forces, then mass Bns for offensive operations against our units when and if the opportunity is presented. One opportunity would be the Sqdn CP if lightly defended. Another would be a Bn swooping the SONG AN LAO Valley. Attacks there would come from hills on both sides during periods of low visibility.
- (3) If VC/PAVN forces are surrounded and trapped in hill masses and are subjected to massive firepower they will attempt to break out. This would be an opportunity for allied forces to exploit.
- (4) Peculiarities and Weaknesses: The time of the operation coincides the Vietnamese New Year period (TET). An exceptionally large number of VC/PAVN forces can be induced to surrender using the CHIEU HOI theme, if Psy Ops are programmed to the maximum.

2. ESSENTIAL ELEMENTS OF INFORMATION:

- a. Will enemy ambush LZs?
- b. Where are enemy units and headquarters?
- c. Priority to:
 - (1) Fortified areas.
 - (2) Logistical facilities.
 - (3) Training areas.
- c. Does the enemy have 12.7mm CHICOM MGs or 120mm Mortars in area? If so, where and how much ammo is available?
- d. Will enemy attack Sqdn CP or other units?
- e. What routes and bases are used by the enemy for infiltration of units, replacements and supplies into area of operation?

3. OTHER INTELLIGENCE REQUIREMENTS:

- a. Report incidents or acts of hostility by civilian populace.
- b. Report enemy contact or movement of enemy forces.
- c. Report well used trails and villages not on maps.

4. WEATHER: Weather forecasts will be issued daily.

5. MISCELLANEOUS:

- a. Viet Cong Captives (VCC) and Viet Cong Suspects (VCS):

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

Annex A (Intelligence) to 1/9 Cav OPORD 1-66 OPERATION SHOEMAKER (U)

- (1) VCC captured during a combat operation may be detained for tactical exploitation until the close of that specific operation. VCC will then be transported by the quickest available means to the nearest VCC collecting point for disposition.
- (2) Each Troop is responsible for the proper and humane handling of VCC or VCS whom it apprehends. VCC and VCS will, in all circumstances, be treated humanely while under the responsibility of US personnel. Medical aid will be administered to the sick and wounded.

b. Captured Documents and Material:

- (1) Captured documents will be initially screened for tactically valuable information, then forwarded to Sqdn S2. If the document is translated at Troop level, a copy of the translation will accompany the document.
- (2) All captured weapons, mines, booby traps, snares, explosives, medicines, commo equipment and uniforms will be marked or tagged, as appropriate, and reported in accordance with Div TAC SOP. Unusual equipment or material should be left in place and guarded until MI personnel can investigate.

c. COMINT: The VC is active in COMINT and jamming. Troops will stress commo security and net discipline at all times. Date, time, frequency, description and effectiveness of radio jamming will be reported through the Sqdn S2 to the Div Sig O.
