## 3. Commanders Comments

## Discussion

When the Troop is employed in a screening or other security mission it must be recognized that a re-inforcement unit must be available. The organization is intended for an economy of force and to detect and maintain contact with the enemy. The Troop is not designed to conduct mounted assaults.

## 4. Recommendations

With intense consideration given to the enemy capabilities, that this Troop realign itself with an organization to conduct mounted assaults in the form of CAVS. Further with the new organization all other Cavalry missions can be accomplished with no change in the degree of professional competence or aggressiveness Troop D now enjoys.
