Subject : Description of layout and data elements in TAGCEN (The Adjutant General's Center) Casualty Information System, 1961-81

To : Users of printout of full public records from the TAGCEN Casualty Information System, 1961-81

When reading the pages of printout from the TAGCEN Casualty Information System, 1961-81, there are a number of things to keep in mind.

1. The attached pages were printed from a large computerized database of records maintained by the [U.S. Army] Adjutant General's Center, on casualties incurred by all personnel of the U.S. Army and their dependents worldwide, 1961-81. The pages are from a subset that was limited to casualties of Army Active-Duty Personnel who died 1961-81, (N=60,484 including duplicate records). The subset excludes all nonmortal casualties, including those that may have resulted in death after 1981; and all casualties, mortal and nonmortal, of non-active duty Army personnel or dependents.

2. There is one line of information for each casualty record. The printout was formatted to maximize the use of space on each line. As a result, some lines are difficult to read. We suggest that researchers separate out the data elements (variables) of interest by drawing lines between the fields of interest to them.

3. The two pages headed, "Input, Output, Master Definition..." provide a list of the data elements (variables) per casualty included on the printout page. They are listed in the order in which they appear on the line. Also given is the field location (i.e., character position on each line), the size of the field (number of characters of the variable), and the acronym used on the printout to identify the related data element (variable).

Please note that on the printout, some acronyms are printed horizontally, some are printed vertically, and some are printed horizontally in a vertical stack.

4. The rest of the pages have the codes used for each of the data elements (variables). These are not given in exactly the same order as they appear on the line, but a match can be made by using the name of the data element (variable). Please note that on the printout, some acronyms are printed horizontally, some are printed vertically, and some are printed horizontally in a vertical stack.

5. All users of these data should note that despite the fact that HOMETOWN is used as the acronym for the variable "home of record," it refers, when available at all, to the place or municipality given as home of record at the time of last entry into the Army. It therefore does not necessarily refer to the place of birth, residence of next of kin, place of longest residence or other common uses of the term "hometown."

6. The attached pages contain records for servicepersons whose Major Organization is listed as the 101st Airborne Division, Ambl. (coded "OA" in the database).
