Dear Mr. Konek:

For purposes of expediency a letter of transmittal is being utilized by this office. The enclosed material is provided in response to your recent request. Helicopter Training Squadron 8 did not submit data that covered all the information you requested in your recent letter. The enclosed material, from the squadron's history reports, normally only included the pilot output for each year. There are gaps in this material which are the result of the squadron failing to submit a History report or not including information on its yearly pilot output.

Please contact the Public Affairs Officer, Helicopter Training Squadron 8 for other possible sources that may have the information you are seeking. The address is NAS Whiting Field, Milton, FL 32570-5120.

MIKE! I JUST FINISHED A LETTER TO
P/A OFFICER HT-8 FOR CLASS NO. 8111 SEND
WHEN I RECEIVE IT.

1990

Helicopter Training Squadron EIGHT, located at Naval Air Station Whiting Field, Milton, Florida, provides primary and advanced helicopter training for Navy, Marine Corps, Coast Guard and allied student aviators. HT-8 is staffed by 82 officers (58 Navy, 21 Marines, and 3 Coast Guard officers), 44 Navy enlisted and 3 civilians. This command provides flight training for approximately 300 students annually. The squadron flies the TH-57 Bell Sea Ranger Helicopter in the B and C models for its training. Custody of these aircraft is maintained by Commander, Training Air Wing FIVE. All maintenance and simulator support is provided by civilian contractor. Burnside-Ott was responsible for TH-57 maintenance until October when it changed to United Nuclear Corporation Support Services. Loral Corporation provides simulator support.

In 1990, HT-8 was forced to operate much more efficiently and effectively than ever before in its history because of budget cuts, decreased PTR, reduced total flight time (46,441 in 1989 and 39,600 in 1990) and an unavoidable lack of aircraft availability (due to cracks found in crosstubes of the majority of aircraft.) As a result, student time to train decreased from 24.1 weeks to 23.1 weeks and the number of hours per sortie (hps) decreased from 2.06 (hps) to 1.95 (hps).

HT-8 utilizes Pilot Training Rate (PTR) as a measure of success with regard to accomplishing its primary mission. The FY 90 PTR was completed ahead of schedule, resulting in the winging of 178 Navy, 96 Marine Corps, 11 Coast Guard and 12 Allied Students. The student training completions and record of total flight hours per month for the calendar year are provided below:

The FY89 PTR was completed three weeks ahead of schedule, resulting in the winging of a record 220 Navy, 90 Marine Corps, 13 Coast Guard and 11 allied Students.
