November 11, 1996
VETERANS DAY

Admiral E.R. Zumwalt, jr.

Dear Admiral Zumwalt:

I hope you received the analysis on Agent Orange/Dioxin and spina bifida that I faxed to you on November 4, 1996. I could have written more but wasn't sure how lengthy you wanted it to be. I can do more if you want as the analysis is in my computer and I will be updated it in the future. I think that the Minnesota study and the British Columbia study truly confirm the validity of dioxin's effects on paternally mediated birth defects.

I have now had two surgeries in the last two weeks and hopefully, will be getting better. To my knowledge, I do not have bladder, prostate, or colon cancer. My prostate was reduced in size and I am taking antibiotics to prevent infection.

I have enclosed the computer disk to my scientific studies. The studies are on a program which is called Q and A version 5.0. It is new and was released recently replacing the old Q and A version of 3.1. I realize that the program is not well known but I used it because it was very simple and anyone could access it. If there are any problems, please let me know because my office manager is a computer expert and he should be able to answer any questions. I will be supplying updated disks to you every six months.

I have given considerable thought to having this disk (s) placed in the new building at Texas Tech University. I have come to the conclusion that the world has every right to know all of the scientific evidence related to Agent Orange/Dioxin. I spent 18 years documenting these studies. I guess you could say it is my life's work.

We have seen for years how misinformation has been spoonfed to the media from greedy corporations that don't give a damn about human life. And Government bureaucrats that are interested in saving money. It would be a international human tragedy to hide the truth on probably the most lethal class of chemicals ever known. Perhaps someday these studies may help in the incremental change of philosophy on how the world looks at cancer, disease, and birth defects. Perhaps, instead of simply finding cures for these problems, a more honest and human approach will be implemented on finding the CAUSES of these problems. If the American Medical Association wasn't politicized, they would have done it a long time ago.

I have included a work sheet on the computer on how to utilize the disk.

There are 20 categories which can be accessed including Desert Storm. However, there is not much on Desert Storm YET but there will be.

Please have your office notify me when this arrives; I want to make sure that it gets there. *Idi*

Very sincerely,

George Claxton
George Claxton

PS: Any study can be accessed by Authors first name, title, type of chemical involved, species (male/female). This is part of the simplicity of this database.

FOLLOW THESE STEP TO OPEN THE FILES .

THE PROGRAM IS Q&A VER 5.0

STEPS

1. OPEN Q&A

2. FILE

3. SEARCH/UPDATE

4. FILE NAME:A:#1 (WHAT EVER THE STUDY NUMBER IS)

(DEPEND ON THE DRIVE YOU PUT THE DISK IN ON YOUR COMPUTER)

#1. ANALYTICAL

#2. SOFT TISSUE SARCONA

#3. NON HODGKINS LYMPHOMA

#4. HODGKINS

#5. LEUKEMIA MM

#6. RESPIRFTORY

#7. PROSTRATE

#8. LIVER

#9. SKIN

#10. NAVAL-BRAIN

#11. OTHER CANCE

#12. MECHANISM

#13.DEVLREPRO

#14. MUTAGEN

#15. AN TOX

#16. IMMUNE

#18. HUM TOX

#19.NEVRO

#20. DESERT STROM
