

E. R. ZUMWALT, JR.  
ADMIRAL, U. S. NAVY (RET.)

February 16, 1993

Honorable Carol Browner, Administrator  
Environmental Protection Agency  
U.S. EPA Headquarters

Dear Administrator Browner:

The purpose of this letter is to join with the other concerned organizations who have written to you to call to your attention the environmental consequences of the prospective dredging of the New York Harbor.

As one who has developed expertise in the field of dioxin and its effects and on behalf of the Agent Orange Coordinating Council which I chair, I request your intercession on this matter. I think such action would have a favorable impact well beyond the very serious issue involved.

With all best wishes for continuing success,

Sincerely,

E. R. Zumwalt, Jr.
