Dear Mike:

We are writing to request that the IOM hold public hearings on progress as the review of Agent Orange exposure continues.

We make this request because we believe the public hearings and meetings you held during 1992-93 were extremely important in allowing dialogue between the committee and the veteran community. As you prepare for your 1995 report, we believe similar dialogue is imperative.

Vietnam veterans and their families have developed a trust of the good work of the committee. We believe continuing dialogue and input is necessary for that trust to continue and grow.

Sincerely,

William W. Lewis

Executive Director
