

8/10/94 130PM

Dr. Paul Scipione (H) 908-548-8096  
① Computer  
he brought a 486 notebook (w/software

loaded) to Dr. Phoung @ Tu Du hospital.

It was a grant from Sea-Land Corp in  
connection w/ his teaching @ Montclair)

he thought 10-80 could use a 486  
notebook also. Modems would be good  
Also need people to go over + teach computer  
skills. (Hospitals etc mostly have 286  
w/ 5 1/2 floppy drives)

② Trip

Dr. Scipione was just in Vietnam a month  
ago. He is forwarding Adm 2 his daily  
diary of the trip.

He noted on his trip that

birth defects are declining  
Cancer in ♀ in late 20/30s is on increase  
(these would have been people alive during  
spraying). Would expect cancer  
rates to decline once this segment of  
population grows older

Environment back to normal.
