Hey there. Just wanted to update you on the discussion with Mr. Randy Deitering, Executive Director, President's Foreign Intelligence Advisory Board (PFIAB) today. Randy indicated that in the waning months of this administration's PFIAB they were really looking for a gopher for a variety of projects. That is clearly not the best position for me. Having said that, Randy indicated that he would ask the Senators to consider a temp assignment of someone with extensive BWD capabilities to the PFIAB staff with the indication that individual would report to Bud Z for projects unspecified. Now that seems like a great position for me. I assume you will hear more before I do so. If I here anything else, you will be the first to know... Hope you are feeling like your usual self about now.... My best/S
