

ADDENDUM TO JCS Item 7/10/70

Difficulties concerning implementation of NSDM-66 - and
Sisco/Pranger differences

This memo reveals a continuing institutional split with DOD generally favoring getting concrete quid from the Israelis in response to ^{its} equipment and State and NSC generally then willing to give the equipment to Israel without qualifications. The difference is, of course, that State and NSC never fully appreciated how badly providing equipment hurt our own ^{U.S.} defense capabilities.
