

E. R. ZUMWALT, JR.
ADMIRAL, U. S. NAVY (RET.)

10 August 1988

Dr. Eve Snead

Dear Dr. Snead:

I attach a copy of a letter from Diane Murray and request that you send me the information to which she refers.

All best wishes.

Sincerely,

E. R. Zumwalt, Jr.

AUG - 4 1988

Dear General Zumwalt:

My heart goes out to you + your family over your son's bout with cancer. My husband is a Vietnam veteran and has pre-cancerous blood tests.

Although I admire your courage in accepting responsibility for using Agent Orange I, like many others, believe something else caused the high rate of cancer in Viet Nam vets. Agent Orange may not be the culprit. I'm scared because I believe it is true.

Please contact Dr. Eve Sneed %

.. She has evidence that a cancer causing virus was in immunizations given to servicemen during the 60's. I implore you to get her UCR tape: Immunization Related Syndrome.

My husband and I have nothing in our hearts except admiration and respect for you. We know you will investigate this possibility. The CDC, NCI NIH + WHO are implicated. ~~Ben~~

Thank you for your time,

Diane Murray
