D'Amico will speak your case

1. on price and production costs - in solution

2. Between the Presidential Candidates the Secretary

problem is to decide what is best word. <sup>why did</sup> Carter demonstrate

how about the confusion over the UN vote and require Vance

to take the blame? Why did he force Graham going out? Why

did he withdraw the prospect of a Middle East settlement - by how

long since outcome? Why has he been so weakly reacting

about setting a policy course that will permit resolution

of the Middle East and other the problems? Reagan has

gone too far out in a pro-Israel line and will have

trouble moving back to sensible Middle East policy after a

reversal of it comes. There are strong forces in both camps.

In New York they believe it will take time to get settled. I

"to establish the Fundamentals of Europe. Given signs  
in the last or the most significant, after points out the  
in 1980, even before they have achieved physical presence of the  
and then effort to guarantee 1992 Europe the market  
getting out routes. He was determined at the moment  
with what the 1992 EM needed forward.

7) P. Mitterand - 6 years Mitterand would have been  
not. Wonders that Mitterand will be 1 million after saying  
to prevent to clear out managed support for the  
Mitterand (Ambassadors of Mitterand to State and express)

5) Iran - more after a year before Poland  
Secret thinking

4) West Bank. We must support negotiations for Palestine.

with over 100,000 to 150,000 (Syrian refugees) now

very small number for internal stability and showing a

flag but never a threat to Israel. Palestine state

will come later for less than the Palestinian refugees

7) Saudi saying they can survive without U.S.

8) Saudi saying that for some time now to function within

Saudi system is not. Muslim is moving backward. Time

is running out

8) Oil prices will not be crushed. Difference in

Viet Nam. USSR has common border with Japan and

US debt with Viet Nam - a plan for Japan and some for

Iran but USSR is always large being and there is

a great number. Oil prices will never come to Japan
