- Main coordinating units : Yen Vien Coalimex of the Ministry of Energy and the PROTEC of the Ministry of Education and Training .

- Sponsored by :

- Aims of the project are :

- researching and designing some new multipurpose-moveabled and modulization toy-equipments ( it's a new conception in this field ) for children and the disabled children who have troubled by the war or by chemical poisons

- Organizing to manufacture and supply all kinds of new toy-equipments at any where that they need .

- tranfering its design or products to other countries for the sake of humanity and good will or will come to help them as the good experts in the field .

- establishing the good relationship with organizations and personals who are considering to the humane problems .

- The need of the project :

Over 30 years in highly devastating wars , Vietnamese people had to stand in sacrifices and hardships ,some of them have become the disabled because of the war of which ,a big number are children . For the sake of humanity , we have decided to do something to help them ,the more the better and the sooner the better . We have been making the first draft a humane project so that living conditions of the disabled children will be changed towards better .

- Planning of the Project :

i. About models of new toy-equipment :
