The Institute of Environmental & Human Health
Box 41163
Lubbock, TX 79409-1163

Dear Ron:

I had breakfast with Admiral Reason last Friday morning.

He was still full of praise for your project and for the wonderful reception that he was given by Chancellor Montford and all the rest of your wonderful team.

He has agreed to recommend to his boss, Admiral Gehman, that he make a visit. Admiral Gehman would be the one that actually handles the command most likely to be interested in using what we have produced at Texas Tech. He has also written to the Secretary of the Navy Richard Danzig, who is one of the most knowledgeable people in the government concerning BW, and has recommended that he visit. I am following up with both of those officials.

I hope you have by now taken Dave Freymann's advise with a follow-up note to Paul Reason so the staff has a piece of paper to follow up on.

All best wishes.

Sincerely,

E. R. Zumwalt, Jr.
Admiral, USN (Ret.)
