Dear Admiral Zumwalt,

Thank-you very much, Admiral Zumwalt. After reading the literature you send, I will brief the training group here, and begin (with Steve Kornguth) the necessary interactions to facilitate strong intra-city, inter-city and interstate communications. We are convinced that, with the three Universities and participating government partners, the alliance can develop a medical response plan that can be very effective in a CBW event. I'm sure you appreciate now, more than ever, that the proposal is very strong with the individuals and Universities involved. Right now, it is a matter of staying cohesive in our commitment and alliances. Thank-you so much for your guidance along the way.

I am glad that Margaret Hamburg now is aware of our presence, and is positive regarding our approach.

Lynn
