Dear Admiral Zumwalt,

I was impressed with Ken Alibek's seminar relating his research interests in biodefense. I just finished reading his new book, BIOHAZARD, which puts everything in glaring perspective. From his talk, however, I got neither a sense of his current affiliations nor exactly how we might be able to collaborate. Of course, he's incredibly knowledgeable in areas of interest to our program; therefore, I'm sure there would be many people at Tech interested in his perspective and scientific expertise. Could he give a seminar here, and see the facilities?

Please advise.
