Thanks for the letters. In regard to the Kendall/Montford letter, I would encourage them:

- 2 1) To contact Stephen Johnston at UTSW (Johnston#m#_Stephen@Ryburn.swmed.edu). He is one of my best PIs and has a Center for Biotech Innovation in full swing there...maybe there is a trans-Texas effort that could leverage and enhance the existing DARPA efforts.
- 2 2) To have the focus group leaders scan the DARPA website for possible PI/project interactions <http://www.bwd.org> <<http://www.bwd.org>> and <http://www.bwd.org/upc> <<http://www.bwd.org/upc>> for my program
- 2 3) I would also encourage you to seek suggestions from Larry Lynn personally in this regard in that he is a member, along the usual folks like Josh, of the TRAC...

In regard to Fatih, I am of course interested in the septic shock aspects if secondary to infectious causes. If Fatih is looking for the mainstream military, I can commend several folks but what is his need? For R, D, T, E, manufacturing, marketing, distribution etc? The general DoD research community is a shambles right now but I would be glad to point him to some honest brokers. My best to you and the family for the Holidays.

S

PS My best to you and your family, too, Priscilla.
