Hi Priscilla.

One of my PIs, Dr Steven Kornguth, has recently been to TTU and is well acquainted with both my program's and national needs for BWD. I would be glad to enlist him as a coordinating/integrating asset to Z. Please ask if he would find that useful.

I have several PIs in Texas and I can envision ways to leverage my existing funding/programs with the start-up at TTU of interest to Z.

My best/S

Shaun,

In response to your inquiry, Adm Z is going to Texas Tech University to meet with Dr. Ron Kendall at the Institute of Environmental and Human Health about their work with BW.

You're welcome to join in although we understand your schedule will not allow.

Let me know if you need more information.

Priscilla

Shaun

I welcome your offer to bring Dr. Steven Kornguth into the Texas Tech equation. I would be grateful if you would ask him to contact me, and I will work him into the network promptly. Please also give me his location and telephone number.

I also welcome your offer as a result of your several PIs in Texas to work with me on tying some of your existing funding/programs into our start-up at the Texas Tech.

Shaun, please help me to move quickly on this since as you know I am going to be attending a decision-making meeting in Lubbock on Monday, January 25.

Also, I still hope to get a specific paragraph from you that I can use at that meeting that will alert my people at Texas Tech to start thinking of research that would leverage into your existing funding program or desired future ones.

With great appreciation.

z
