Re: Description of layout and data elements in TAGCEN (The Adjutant General's Center) Casualty Information System, 1961-81

To: Users of printout of full public records from the TAGCEN Casualty Information System, 1961-81

When reading the pages of printout from the TAGCEN Casualty Information System, 1961-81, there are a number of things to keep in mind.

1. The attached pages were printed from a large computerized database of records maintained by the [U.S. Army] Adjutant General's Center, on casualties incurred by all personnel of the U.S. Army and their dependents worldwide, 1961-81. The pages are from a subset that was limited to casualties of active duty Army personnel who died 1961-81, (N=60,484 including duplicate records). The subset excludes all nonmortal casualties, including those that may have resulted in death after 1981; and all casualties, mortal and nonmortal, of non-active duty Army personnel or dependents.

2. There is one line of information for each casualty record. The printout was formatted to maximize the use of space on each line. As a result, some lines are difficult to read. We suggest that researchers separate out the data elements (variables) of interest by drawing lines between the fields of interest to them.

3. The following page provides a list of data elements and their location within the line. The value labels associated with each data element refer to the attached codelist which identifies the values of the coded information. Also indicated is the acronym used as a heading on the printout pages.

Please note that on the printout, some acronyms are printed horizontally, some are printed vertically, and some are printed horizontally in a vertical stack.

4. The remaining pages identify the codes used for each data element. These are listed in alphabetical order, by value label. Please note that we do not have codes for the variable "miloccup" (military occupational speciality), and that not every variable was entered for every casualty.

5. All users of these data should note that despite the fact that HOMETOWN is used as the acronym for the variable "home of record," it refers, when available at all, to the place or municipality given as home of record at the time of last entry into the Army. It therefore does not necessarily refer to the place of birth, residence of next of kin, place of longest residence or other common uses of the term "hometown."

6. The enclosed pages contain records for servicemen from the 173rd Airborne Brigade (coded) "AB" in positions 116-117, sorted by major organization thereunder by casualty date then by last name. A second printout is sorted by major organization, then alphabetically by last name.
