I, CPT Douglas P. Terry, Sr., [REDACTED], have flown the Search and Rescue mission in the vicinity of YD 048266 numerous times between 21-27 May 71 as team lead in an AH-1G gunship.

The area of the downed aircraft is a known NVA infiltration route with numerous trails and bunker complexes throughout the area. Most of the trails have signs of activity within 24 to 36 hours. During the period of the search, I have not seen or heard anything concerning the downed pilots. The OH-6A has found numerous signs of movement but no actual signs that indicate that the movement might be the survivors.

Due to the known enemy activity throughout the area, I doubt that a person would be able to avoid being captured or killed by the enemy.
