1. The seventh French/United States Army Staff Talks were held at the US Army War College, Carlisle Barracks, Pennsylvania, from 14-17 June 1983. These talks were most successful, due in large part to the efforts of individuals like you.
2. Your briefing in support of the conference was characteristic of the superb efforts I saw. The manner in which you insured our French counterparts got the message was commendable and appreciated. Moreover, while at first glance your role may have seemed small during this round, your presentation was an integral part of a significant cooperative effort between the French and US Armies.
3. On behalf of both the French and US Delegations, thank you for a job well done.
4. A copy of this correspondence will be placed in your official file.
