magazine

CAROL PAYNE, sophomore pre-vet major from Galien, has earned so many honors and titles she has almost lost track. For instance, she has won 30 grand champion awards in 4-H Club work. In various livestock competitions her entries have brought her 155 trophies and 750 ribbons. In six showings at M.S.U. Block and Bridle events, her horses have won five firsts and one third. She is one of the "royalest" students at State, having been chosen queen of practically everything. She was Berrien County's Dairy Queen, Junior Livestock Show Queen, Miss Galien—to name three.

THE CAMPUS BOOK STORE

Among Ourselves

Some of the most interesting people come to visit us in the editorial rooms of your M.S.U. Magazine! In fact, these contacts are so rewarding to us that they have become major compensations in our lives.

Most of the guests are alumni, back on campus to see friends and relatives and to look over familiar scenes of other days. While here they frequently pay us a call, little realizing what a bunch of spiders we are—always poised and waiting to trap them into telling us of their adventures.

In almost every case they come for information. We quickly bring them up to date, so far as possible. Then WE begin the questioning. At the finish, each poor, worn-out visitor realizes that HE and not US, has been giving out with the facts.

What each says is always highly informative, generally surprising and, not infrequently, bazaar.

Hyanas, for example.

A few days ago Mr. M. J. Church, '52, a missionary to Africa, visited us, and the conversation eventually veered around to wild animals; particularly to those found in Ruanda-Urundi, the country of central Africa in which he is stationed.

We hazarded the guess that possibly lions are the creatures he and his wife and children fear most.

"Not at all," he said. "We have few lions now. And it is on this account that we fear the hyenas most."

"Why should this be?" we queried.

"Hyenas originally subsisted mainly on the abandoned animal kills of lions. Since we now have few lions, the hyenas must subsist on something else."

"And that is . . .?"

"Humans."

Mr. Church gave his reply in a matter-of-fact, what's-strange-about-that? fashion.

"In many areas, the natives leave their dead out in the open for the hyenas," he said. "When the supply of corpses is insufficient, the animals, having developed a taste for humans, attack living persons. It's as simple as that."

Steps are being taken, he said, to rid the area of the vicious predators and to modernize the customs of the people. Progress in both, he explained, is slow.

"The land is vast and the hyenas are wary," he recounted. "Customs of centuries' standing are difficult to change. Until the hyenas are eliminated, we will have trouble disproving the pure native logic that 'it is better to give them our dead than our living.'"

The Michigan State University Magazine is published by the Department of Information Services, Michigan State University, 18 times yearly: Once in January, March, June, September; twice in February, April, May, December; three times in October, November. Subscription prices: \$4 for one year; \$7.50 for two years, and \$10 for three years. If any subscriber wishes his magazine discontinued at the expiration of his subscription, notice to that effect should be sent to the publication office. Otherwise, it is understood that a continuance is desired. Publication office is at Ward C, Wells Hall, Michigan State University, East Lansing, Michigan. Entered as second class matter at East Lansing, Michigan, under the act of Congress, August 24, 1912. Re-entry at East Lansing, Mich.

Gifts and Grants

Gifts and grants of \$351,467.82 were accepted for the University by its governing body, the State Board of Agriculture.

Included were 28 grants totaling \$38,659 to be used for scholarship and loan fund purposes.

Also accepted by the board was a \$51,000 grant from the National Science Foundation, Washington, D. C. to support a previously announced summer institute for high school teachers of science and mathematics.

The grant will be used under the direction of Dr. Frederic B. Dutton, director of M.S.U.'s Science and Mathematics Teaching Center.

The Board also approved renewal of a memorandum of agreement with the United States Atomic Energy Commission covering a \$50,000 grant to be used under the direction of Dr. H. B. Tukey and Dr. Sylvan H. Wittwer in horticulture.

The AEC grant includes \$25,000 for continuation of studies concerning radioactive minerals applied to leaves of plants and \$25,000 for a 15-minute film showing how atomic energy by-products are used to trace the movement of nutrients through the plant.

In Many Languages

The film was produced under the direction of the department of horticulture and the extension television unit of Information Services at M.S.U. The picture is being voiced in five languages—including Russian—and will be shown throughout the world after its premiere this month at the International Conference on atomic energy in Geneva, Switzerland.

Two grants were accepted from the Quartermaster Food and Container Institute, Chicago, for studies concerning the effect of irradiation on the preservation and storage of meats.

These grants include \$24,585 to be used under the direction of Professor Lyman J. Bratzler and \$16,220 to be used under the direction of Dr. Albert M. Pearson, both in the department of animal husbandry.

A \$9,000 grant was accepted from the Quartermaster Research and Engineering Command of the U.S. Army to be used under the direction of Dr. Ralph N. Costilow in the department of microbiology and public health.

His study involves the physiological factors which contribute to the radio-resistance of spores of clostridium botulinum. He explains that "this is the most resistant organism to irradiation that we know and the resistance is known to vary with certain factors."

Calendar: Sept. 15 - October 15

Conferences

September

- 15-16 Club Managers
- 15-18 Tank Truck Transportation
- 15-20 Organization Management
- 17-18 Michigan Hatchery
- 18-19 Building Officials

Affairs of State

As we go to Press!

Six faculty members have been honored for their outstanding work in teaching, research and extension by the M.S.U. chapter of Phi Kappa Phi, national honor society. Elected to the society were F. G. Alexander, speech; Gabel A. Conner, surgery and medicine; Paul J. Deutschmann, communications research; Jacob A. Hoefer, animal husbandry; Anthony Koo, economics, and Frank H. Mossman, business ad.

Dr. John M. Hunter, acting head of the department of economics, will spend a year at the University of the Andes in Bogota, Colombia, where he is to help organize and direct a newly established economic research institute. His leave begins this month.

Two composers from the University shared in the annual Student Composers Radio Awards given by Broadcast Music, Inc. Jack N. Kimmell of Dearborn, a Ph.D. candidate in composition at M.S.U., received \$1,000 for his "Concerto Grosso for Orchestra and Wind Quintet." Richmond H. Browne of Flint won \$500 for his "Overture 1957." A 1956 M.S.U. graduate, Browne now is studying under a fellowship at Yale University.

Dr. Egon A. Hiedemann, professor of research in physics at Michigan State University described his work in ultrasonics (high frequency sound waves) while at the University of Goettingen, Germany, this summer.

A new Division of Mass Communications was approved during the summer by Michigan State University's governing board. The new division in the College of Communication Arts includes the existing School of Journalism and two new departments, advertising and radio-television-film.

Dr. Noel P. (Pat) Ralston, head of the dairy department, has been elected a director of the American Dairy Science Association. His three-year term will run from 1959 through 1961. Ralston will be one of six elected directors to serve on the association's nine-man board. The group represents all phases of the nation's dairy industry and has a membership of 2,500.

The head of the recently established University of Hue in South Vietnam was a guest on campus during the summer. A reception and luncheon at Kellogg Center were held for Father Luan, who was in this country seeking books, laboratory equipment and support for the university at Hue.

Dr. Hermann H. Thornton, head of the department of foreign languages, was awarded the Ordre des Palmes Academiques with the rank of Chevalier, by the government of France. The distinction, announced by M. Jean Desparmet, French consul at Detroit, is in recognition of Dr. Thornton's "remarkable achievements and constant efforts to further the knowledge of the French language and culture in the United States."

Professional women secretaries from across the nation are participating in a liberal arts institute at the W. K. Kellogg Manor House at Gull Lake. The event is sponsored by the National Secretaries Association and Michigan State University.

Ready for an expedition to Mexico are, from left, Russell Jameson, Saginaw industrialist; Max Hensley, M.S.U. reptile expert, and Dr. Rollin Baker, head of the Michigan State Museum.

On a bright morning in June this huge gravel truck overturned in front of the new women's intramural building. It attracted much attention, but was soon righted.

On and off the campus in the

GOOD OLD SUMMERTIME

On July 28 five cars of a Grand Trunk freight train jumped the tracks east of the Harrison Rd. crossing on south campus. Workmen labored into the night to clear the right-of-way.

Members of the Ingham Alumni Club recently met at the Lansing Country Club. George Conway, '11, outgoing president (third from right seated) was host.

Piled nearly as high as the trees is this 10,000 ton supply of coal. The stockpile, located near the power plant, will last 30 days in the middle of winter.

The Rochester, N. Y. Alumni Club gathered for a picnic at Powder Mill Park this summer. The New York alums elected new officers at the picnic.

Six hotel administration majors held a picnic at Shawnee-on-Deleware, Pa. in July. Paul Grant, '54, at left, was host for the group.

Where Are

State's Football All-

NEIL J. DAPRATO
'15

Jerry is the first Spartan to receive the All-American award. He is retired and living in Parkesburg, Pa. following careers as a businessman, engineer, coach and farmer.

Sid is a resident engineer for the Chesapeake and Ohio Railway Co. in Milwaukee, Wis.

The second State man named an All-American, he was decorated for his services in W.W. II.

SID WAGNER
'35

JOHN PINGEL
'38

The third Spartan to become an All-American, John has gone on to make a success in the field of advertising. He is now vice president of Brooke, Smith, French and Dorrence, Inc.

One of three Spartans to make the 1949 All-American team, Ed is now a sales representative for Brainard Division of the Sharon Steel Co. He and his family live in Dearborn.

ED BAGDON
'49

LYNN CHANDNOIS
'49

Formerly with the Pittsburgh Steelers, Lynn is in insurance sales, with the Paul Revere Co. He makes his home in Pittsburgh. He holds 10 individual grid records.

AL DOROW
'51

One of State's finest quarterbacks, Al is still throwing the football. He is top passer for the Philadelphia Eagles. While at M.S.U. he set records in passes attempted and completed.

The husky lineman who helped spark M.S.U. to three successful seasons now assists Starr Keesler in the Alumni Relations office. Don keeps active by officiating sports in off time.

DON MASON
'49

Bob works for the Nashua Corporation as a sales representative. He has played professional football and coached at Arizona State College. He holds the M.S.U. record for yards gained passing.

BOB CAREY
'51

EVERETT GRANDELIUS
'50

Sonny has been on the M.S.U. staff since 1954. After a year in pro ball he returned to work for Duffy. Now backfield coach, Sonny holds three major Spartan athletic awards.

DON COLEMAN
'51

Don teaches for the Flint Board of Education. In addition to his classroom work, he is junior varsity line coach. Don is active in civic affairs and recently won an award for his efforts.

Familiar to football fans as an outstanding end of the Detroit Lions, Dorne sells for Milsmith Industries, Inc. during the off season. He has been traded to the New York Giants.

DORNE DIBBLE
'50

Two-time All-American, Jim doubles as a football player and teacher. He plays for the Regina Roughriders of the Canadian league, and teaches in Chicago.

JIM ELLIS
'51 AND '52

They Now?

Americans Report

drillmaster when State placed its first player on the country's famous mythical team. Charles W. Bachman (1933-46) had two players who won the honor. Biggie Munn (1947-53) coached 15 All-Americans and his successor, Duffy Daugherty, has seen six of his men get the award.

Now, as another season draws near, the names of these All-Americans appear again as alumni relive Spartan successes of the past 61 years. As football takes over the sports spotlight many M.S.U. fans voice a familiar question. What has become of the stars who led the Green and White to many gridiron victories?

Your *University Magazine* came up with the answer to this query by checking on the 24 All-Americans. We found them all in good health, still performing like champions. Each is proving in the modern workaday world that to be an All-American requires much more than mere ability to handle a football.

Don is terminal manager for the Saginaw Transfer Co., Kenilworth, Ill. division. Previously he was a sportscaster for Grand Rapids WOOD-TV. Don's teams won 26, lost one.

DON MCAULIFFE
'52

FRANK KUSH
'52

A member of State's undefeated '52 team, Frank is now putting his football "know-how" to work as head football coach at Arizona State College. He has been there since '55.

A teammate of Frank Kush, Dick is now his assistant at Arizona State. Another Spartan, Chuck Fairbanks '55, also is on the coaching staff with Dick.

DICK TAMBURO
'52

DON DOHONEY
'53

Don is in insurance with New England Life and lives in Lansing. He completed a tour of duty with the Air Force. Don was a member of State's '53 Rose Bowl team.

A member of State's great teams of '51-'52-'53, LeRoy will enter professional football this fall with the Cleveland Browns. He previously worked in civil police administration.

LEROY BOLDEN
'53

LARRY FOWLER
'53

Larry is finishing work on an M.A. in marketing at M.S.U. Before returning to school, he served in the Army, then as assistant coach at Dartmouth College.

"Buck" joined the M.S.U. staff this fall as an assistant football coach. For the past two years he has coached at Lansing Sexton high school. He has finished six months in the Army.

CARL NYSTROM
'55

GERALD PLANUTIS
'55

Jerry is assistant backfield coach at Indiana University. He has played for the Washington Redskins, coached at Monroe, Mich. high school and completed his M.A. at State.

Norm is a tackle on the Green Bay Packers football team. In his spare time, Norm sells insurance for New England Mutual Life Insurance Co. His boss is John Buda, '48.

NORM MASTERS
'55

EARL MORRALL
'55

An outstanding quarterback at State, Earl is now holding that same position with the Pittsburgh Steelers. During the winter he sells for the Blaw-Knox Co., power piping division.

Recently added to the list of All-Americans, Walt joins the Philadelphia Eagles after a successful career on the Spartan gridiron. His running led the Spartans to an 8-1 mark in '57.

WALT KOWALCZYK
'57

DAN CURRIE
'57

Unanimous choice as the nation's most valuable player in '57, Dan has entered pro ball. Duffy ranks him as one of the greatest linebackers in history. Dan will play for Green Bay.

A Typical Campus Day

In the life of Pham Van Ngu

Pham Van Ngu huddled into his overcoat and shivered. He had been flown in just a few days from tropical Viet Nam to the chilling blasts of a March wind in Michigan.

Overcoming an understandable dislike for cold weather — it doesn't get below 75 degrees fahrenheit in Saigon, Viet Nam — was one of the problems encountered by Ngu (pronounced to sound like "new"). There also was the adjustment to strange faces, American food — as served in a dormitory — and different educational customs.

But with the advance of summer Ngu thawed out and became one of the "hustlingest" students on the Michigan State campus. As a participant in the famed Viet Nam Project Ngu studies office management, personnel management and has a public administration readings course — in addition to English studies.

Michigan State has conducted the project for more than three years. In April 1955 a new Vietnamese government invited the University to establish a program of technical assistance, especially in government administration.

Vital Summit Meeting at Geneva

Viet Nam had been a monarchy under strict French supervision until the Communists took its northern section. At the Geneva summit meeting the nation was partitioned and South Viet Nam set out on the road to becoming a democracy.

The program which Michigan State entered with the U.S. and Vietnamese governments includes the sending of staff members from State to Viet Nam, and the sending of Vietnamese to State.

Ngu is one of many Vietnamese civil servants who vie for a chance to attend Michigan State for a year. He is considered a specialist in public administration at home where he is chief of the secretariat in the Office of the Inspector General of Administrative and Financial Affairs.

At State, Ngu hopes to learn the latest techniques of methods and organization in public administration. He will adapt suitable parts of his training for use under Vietnamese conditions.

Ngu says he is fascinated by the U.S., but his friends say he also deeply misses his wife and four children, one of whom was only two months old when he left Viet Nam.

Consulting map of rambling MSU campus are Pham Van Ngu and Huynh Thanh Hung

on-campus

Ngu contemplates food served in dormitory cafeteria

Library research takes up large part of each day

Ngu and Hung stride to class

Dorm "gab" session engages Ngu and Oral Parks, grad student

Ngu relaxes with student newspaper

Ngu consults Stan Sheinbaum, coordinator of the Viet Nam Project

In office management class Ngu pays rapt attention, looks for details that will be helpful in Viet Nam

Barton, a Spartan,

hustles to Brussels with his plastic roof for Uncle Sam's Pavilion aboard a fleet of giant cargo planes.

Spartan Barton

The familiar doughnut-shaped United States Pavilion that radiates the cosmopolitan spirit of the 1958 World's Fair stands as a significant milestone in the career of an outstanding M.S.U. alumnus.

To W. Dennis Barton, '38, the completion of the uniquely shaped Pavilion is the culmination of many years of work. Barton, a pioneer in the field of structural plastics, designed and supervised the construction of the beautiful translucent, circular Pavilion roof.

Behind him and this major architectural achievement are 15 years of frustration and thousands of hours of research and planning. Barton is probably one of the first persons to lead the way into the field of fiberglass reinforced structural plastics. When he visualized the potential of plastic as a building agent in 1943 only a few men in the country were willing to join him in the search for practical applications of the durable material.

Construct Five Plants

In 1951 Barton and his associates began to make noteworthy progress. That year he put his ideas to work for the Alsynite Co. of California and soon structural plastic became a permanent tool of all types of industry. The Alsynite firm answered a demand for structural plastics by constructing three domestic and two foreign plants.

For the next two years Barton continued to develop dozens of ways to use the reinforced plastic. Soon plastic found its way into the American home. Houses constructed since 1950 have emphasized the use of it in patios, shower doors, skylights and windows.

Barton formed the Dumont Corporation in 1954 and concentrated on production of plastic laminates. These laminates, or panels, are now used in all modern

aircraft, ranging from the conventional propellor driven plane to supersonic jets.

Structural plastic won national acceptance by the early 1950's so the M.S.U. alumnus decided to launch into still another phase of the field. He founded Consolidated Plastics, the first firm in the country to experiment with one-piece molded car bodies made of plastic. Barton also paved the way for production of fabricated plastic building panels which are now being used by the nation's finest architects.

After Barton had directed the building of the world's first mass-produced atomic reactor plant at San Ramon, Cal. (a job that took only 90 days), he was called East to discuss the construction of the United States' World's Fair Pavilion. His knowledge of structural plastics won his firm the contract to fabricate panels for the Pavilion roof.

A few months later six giant Pan American cargo planes landed in Brussels with the entire roof which had been disassembled for easier transportation. Barton had foreseen the necessity of constructing a roof that could be shipped with a minimum of effort and expense. In a few days the tremendous project of assembling the roof was completed.

Not long after the World's Fair had opened a driving rain storm hit Brussels and shattered pavilion roofs and caused damaging leaks. The United States Pavilion was the only building to escape unscathed. Fair officials accredited this fact to the perfect design of the huge plastic roof.

THE UNITED STATES PAVILION has captured the interest of World's Fair goers because of its unique construction. An M.S.U. alumnus, W. Dennis Barton, '38 helped design the modernistic pavilion. The circular, translucent roof is the product of his work.

International Education

The thoughts of many alumni and friends of the University have become focused on tumultuous overseas events. Occurrences in the Middle East, South America and other areas indicate critical problems.

To many observers the need of U.S. help in building internationally educated peoples—both at home and abroad—is seen as one aspect of today's global troubles.

Alumni are familiar with Michigan State University's place as a recognized leader in the crucial area of international education. The University has sought to carry American ideals and methods to the distant corners of the earth.

Among State's significant contributions, alumni can count sponsorship of the University of the Ryukyus on Okinawa and the largest overseas program of any university in South Viet Nam.

Other projects to which the University has devoted itself include development of agricultural colleges in Colombia, business education in Brazil, a program in Pakistan and another under consideration in East Nigeria.

It is against this backdrop that President John A. Hannah has called for a deeper look at international education for the world of today and tomorrow. His remarks in a convocation address to summer school students also help explain the motivation behind Michigan State's overseas programs.

Slow-moving Methods Outmoded

"This is a matter of vital concern to all Americans," Dr. Hannah asserts in asking for a realistic evaluation of scientific developments and the rise of nationalism abroad. The tempo of change has so accelerated throughout the world, he adds, that methods of educating people for a slow-moving, static life are now outmoded.

"Time was when that approach was adequate," Dr. Hannah says, "because students were likely to live out their lives in a world not far different from the one into which they were born.

"Today changes come about with such bewildering frequency that an education must at least try to prepare young people for the kind of a world in which their lives will be lived, a world in which travel in outer space and possibly visits to the moon and other planets may not be more of an adventure than a jet plane flight across the ocean today.

"A fact of life, of which many Americans are not yet fully aware, is that the United States is permanently and irrevocably committed to an active interest in the affairs of peoples and nations throughout the world.

"Isolationism dies slowly, even in the face of facts, and there are still those among us who would have us withdraw behind our ocean barriers and let the rest of the world go hang."

Dr. Hannah says that international developments in recent months emphasize "that the communist bloc is waging an aggressive economic war against the allied nations, seeking thereby to win over to their side those countries which have not as yet finally decided which road to follow in working out their national destinies.

"In the long run, to be conquered by economic warfare is no less disastrous than conquest by military weapons."

Fresh Orientation Needed

One of the first tasks of America, as outlined by Dr. Hannah, is self-education in internationally important matters. He emphasizes the need for a fresh orientation on which parts of the world are studied.

"We are not conditioned to think of the peoples of Asia and Africa in the same manner as we do of the peoples of Western Europe from which our ancestors came," Dr. Hannah asserts.

He suggests that teachers and administrators from all levels of education get together to plan needed improvements.

President Hannah adds that adults past the age of formal schooling also should be considered. They are, he says, the least understanding of the world situation today and the work required of America to meet the challenge of the times.

Achieving international education in other lands is a problem already taken up by American higher education, the president explains, and he cites the projects sponsored by Michigan State "to illustrate that there is a tremendous appetite for education, American style, in the far corners of the world."

There is confidence abroad, he continues, that American education can perform miracles.

"That we have the underlying technical skill to perform these miracles there is no doubt. That we have the courage, the persisting strength of national character required, and the dedicated personnel, remains to be seen."

TV Invades Puerto Rico

Out in the blue Caribbean, down Puerto Rico way, television is as popular as sugar cane and pineapple. And furthermore, the Puerto Ricans have generated a high interest in educational television as well as commercial broadcasting.

These and other facts became apparent to Dr. William H. Tomlinson, M.S.U. television program associate, after he participated in a summer conference in Puerto Rico.

A guest of the Puerto Rican departments of education and public works, the national planning board and institute of architects and the University of Puerto Rico, Dr. Tomlinson was one of four persons representing the United States.

The conference, entitled "Schools for Tomorrow," attracted about 200 Puerto Rican educators. "The purpose of the program," Dr. Tomlinson explained, "was to stimulate an interest in the use of the various types of audio-visual equipment in the classroom. Primary emphasis was placed on the field of science, an area which the Puerto Ricans feel needs immediate developing."

Explains M.S.U. Research

Dr. Tomlinson's contribution to the conference, which was held on the modern University of Puerto Rico campus, dealt with closed-circuit television as a method of instruction. In a speech before the conferees, he outlined the advantages of closed-circuit television, a technique that has undergone years of research and testing at M.S.U.

It is anticipated that closed-circuit television equipment will be provided the Puerto Rican educators for an educational network in the hope it will eliminate crowded schools and overworked teachers. Dr. Tomlinson supported the Puerto Rican development program.

"It is now generally accepted," he added, "that educational TV is as effective as face-to-face classroom teaching. Furthermore, teacher effectiveness can be increased when the medium is approached with imagination and creativity. Also television is popular with many of the students. Perhaps even more important, it permits an unlimited number of students to obtain the best available form of instruction."

Dr. Tomlinson found it wasn't hard to demonstrate the theories he advanced.

"The University of Puerto Rico," he explained, "has one of the finest educational television studios I have ever seen."

Taking advantage of the fully equipped studios, Dr.

Tomlinson organized a day-long workshop and personally supervised the production of four shows—all rehearsing simultaneously—and aired in sequence via closed-circuit television in a span of three hours using inexperienced people.

"When I suggested putting on the four shows," Dr. Tomlinson stated, "one of the Puerto Rican administrators seriously doubted the possibility of such an unusual event. Needless to say the administrator was relieved when the workshop went smoothly and it proved to be a valuable experience for the participants."

"The workshop showed the Puerto Rican educators that teaching through television can be a rich experience and instructional habits can be strengthened by the graphic use of visual materials."

"And for that matter, TV teaching can even overcome language barriers if visual materials are properly used. Such was our case. They spoke fluent Spanish. I did not. But when the four programs were over I had a good idea of what each one said — because each made good use of visual aids."

Puerto Rican educators watch intently as a television production is prepared in the spacious studios of the University of Puerto Rico at Rio Pietras, near San Juan.

The M.S.U. producer also was impressed by the advances the Puerto Ricans have made in commercial television and the current interest in the medium.

"The people seem to be quite consumed with the novelty of television," Dr. Tomlinson remarked. "They even watch full-length movies in the afternoon on a commercial station. This feature has proven so popular that one station, through large advertising revenue, gives away a television set each day. The viewers must write in to win and oftentimes the studio overflows with mail.

"Aside from the interest in the feature film, one of the Puerto Ricans' most popular productions is a live soap opera called 'La Vida del Delores Lorca' (The Life of Delores Lorca)."

Following a similar trend in the United States, the majority of the Puerto Rican TV shows are canned — that is filmed programs, he reported. These shows are imported from the United States and are the same ones that appear on American screens with one exception. When the films arrive in San Juan Spanish speaking

voices are dubbed over the original soundtrack.

Puerto Rico, a territory of the United States, is an island of 3500 square miles, two million population, about 300 miles south of Florida.

"The atmosphere is warm and friendly," Dr. Tomlinson stated, "and there seems to be close compatibility with the United States. I was given a cordial reception and was treated most kindly during my stay on the island.

"You can't help but be impressed by the progress the Puerto Ricans have made. I visited the island during World War II and except for San Juan Antigua, the old, untouched part of the metropolitan area, you wouldn't recognize it as the same place.

"The people of Puerto Rico appreciate the value of television as a desirable method of instruction and are striving for island-wide coverage. At present, their interest in TV appears to be very high. The conference held there this past summer did much to solidify the thinking of administrators and teachers on the future use of instructional television."

The Undergrad View—

Exit Summer.... Postmen vs Parking Tickets.... "Wanna Buy a Barracks?"

"Where did the summer go?" is the question summer school students are asking themselves as they look ahead to fall term, less than four weeks away. Summer school registration records topped this year with an increase of 1,000 students. No doubt the scarcity of jobs had a little something to do with it. Also, summer is the time to take all the unusual, not-too-pertinent-to-major type of courses. Such combinations as pipe organ, shorthand, and nutrition were not uncommon.

The old saying, "The more the merrier," seemed true during the past few weeks as, along with the additional students and intensified studying, came the plays (including *Androcles and the Lion*), foreign films, lectures, conventions, square dancing, and concerts. When the Marines landed in Lebanon, teachers as well as students began to wonder if they would see the term through.

The Post Office has been much in the news lately, and not only because of the 4-cent stamp. It seems delivery men from the East Lansing Post Office mapped out their campus routes on a Saturday when there were plenty of parking spaces. During the week they often must park in "no parking" areas in order to keep on their time schedules. When a campus policeman ticketed one of them (they must pay their own fines), the indignant drivers replied that they would not deliver to a building where they could not find a parking spot.

A plan was finally worked out whereby the drivers could park by loading docks, but not until there was some delay in the services. Ruffled tempers were quickly smoothed over, except for the editor-in-chief of the State News. How does he enter the picture? In gathering information on the circumstances of the affair, he overparked on his meter. You know the rest.

A new division of mass communications in the College of Communication Arts was approved by the Board of Agriculture. Dean Gordon Sabine reports that students will still specialize in one area, but will be made aware of the importance of other media.

Bridge has always been a favorite among M.S.U. students, but a different kind of bridge party took their attention this summer, as plans were made for a group to attend Mackinac Bridge dedication ceremonies.

Only 416 of the barrack apartments constructed after World War II for veterans and their families remain. The barracks off Harrison Road are being sold to the highest bidder. Beginning this fall term there will be 1,940 new brick apartments ready in their places.

Slowly one phase of the growth of educational institutions is passing, giving way to a new, more permanent arrangement.

It used to be that students preferred attending the main university rather than a branch. As plans progress for the M.S.U.—Oakland branch, students are becoming more eager to get a view of the estate, including Meadow Brook mansion, and thinking what a luxurious atmosphere such surroundings would provide for studying.

A good many freshmen will not be termed "green" this fall when they start to class. The counseling clinics (one each week) have shown that there will be an enthusiastic bunch of students starting college this month (See page 16). Not only have these kids been counseled as to majors and minors, but they've heard, "Join Block 'S,'" or "Be thinking in terms of winter sorority rush teas," or "Keep your grades up so you can hold an office," or "The round table in the Grill is 'FOR MEN ONLY', coeds!"

Nelda Trout '59

When Paula Skarstad neared the big round table in the Grill, she learned from four men students there that co-eds are definitely off-limits. Men only, is the rule.

Affairs of State

State Men Take Part In Western Meetings

Two staff members from the University participated in the annual meeting of the American College Public Relations association in San Francisco.

James H. Denison, assistant to the president and director of university relations, headed a panel discussion relating to state governments and was chairman of meetings with representatives of the American Association of Land-Grant Colleges and State Universities and the State Universities association.

W. Lowell Treaster, director of the department of information services, is chairman of the communications section of the ACPRA and presided over meetings of that group.

Music of The Great Lures Instructors

Interpreting the works of Bach, Beethoven and other great composers of piano music for the more advanced piano students was the goal of a University workshop during the summer.

About 100 piano instructors from Michigan and surrounding states were at Kellogg Center for the third annual Piano Teachers Workshop, sponsored by the M.S.U. department of music.

Headlining this continuing education activity was Dr. Thomas Richner, of Columbia University. He is the recipient of numerous distinguished awards, has concertized extensively in the United States and Europe and is the author of "Orientation for Interpreting Mozart's Piano Sonatas."

Government Cites M.S.U. Authority

Herbert A. Berg, assistant director of the University's Cooperative Extension Service, received a superior service award from the U. S. Department of Agriculture in special ceremonies at Washington, D. C.

The award was presented by Ezra T. Benson, secretary of agriculture and is one of the highest the U. S. D. A. can bestow on its employees.

Berg's citation recognized his leadership in starting and developing pioneering programs in farm accounting and land use planning in Michigan and in broadening the scope of the state's extension service.

State Professors Author New Texts

Two M.S.U. professors are the authors of new books published by

Dr. Busfield

Harper and Brothers of New York, during the summer. Dr. Roger M. Busfield, Jr., assistant professor of speech, wrote *The Playwright's Art*. His book is intended for the young writer who is contemplating a career of dramatic writing for the stage, radio, television or motion pictures.

Dr. Paul Dressel, professor of education and director of evaluation services, had his new book *Evaluation in the Basic College* released late in June.

Dr. Dressel's book sets forth the results of evaluative studies of the Basic College at M.S.U. He and nine other members of the faculty evaluate the general education program and how it affects the student body.

Dr. Dressel

Visiting Specialists

Two well-known physical education specialists were visiting members of the summer school faculty of the department of health, physical education and recreation at Michigan State University. They were: Dr. C. H. McCloy, State University of Iowa, and Dr. Clair Langton, Oregon State College.

Wins Top TV Award

"Electricity at Work," a television film program produced by Dr. Donald P. Brown of the University department of agricultural engineering, won a top award at the annual meeting of the American Society of Agricultural Engineers at Santa Barbara, Calif.

The program was awarded a blue ribbon rating in the radio and television division of the agricultural engineering extension exhibits.

Educators From Pakistan On Visit

Sixteen educators from Pakistan are now at the University for nine months of training to prepare them for faculty posts in two new academies being established in their homeland.

Michigan State University specialists are providing advisory assistance in setting up academies for village development in Comilla, East Pakistan and Peshawar, West Pakistan.

The program is being carried out under a three-year contract involving M.S.U., the government of Pakistan and the Ford Foundation. The Foundation has awarded a grant to support the project.

Tours Europe for Program Material

Dr. Donald A. Pash, producer-coordinator of fine arts programs for the University television, is now in Europe conducting orchestral concerts.

Dr. Pash, a former student of the internationally renowned French-American conductor Pierre Monteux, is guest conductor of symphony orchestras in Lucerne, Switzerland and Brussels, Belgium.

The orchestras are composed of outstanding music students from conservatories and private studios throughout the two countries.

High Honor To State Professor

Dr. Charles A. Lassiter, associate professor of dairy at the University, received national recognition for his outstanding work in the field of dairy cattle nutrition.

Lassiter received the \$1,000 American Feed Manufacturer's Association award at the annual meeting of the American Dairy Science association at North Carolina State College.

The award is based on original research work published during the last three years. Design of the research project, its thoroughness and completeness and value to dairy production are important factors in selecting the award winner.

Lassiter, who has been a member of the Michigan State dairy staff since 1956, won the award for his work in forage production and dairy cattle.

(Continued on Next Page)

Dr. Lassiter

State Alumna Gets Missouri Univ. Post

Elizabeth Corbishly, '51, assistant director of housing at State, has been named manager of women's residence halls at the University of Missouri.

Miss Corbishly has taken over her new duties, ending 15 years of service to the University.

She is a graduate of M.S.U. and also received an M.A. degree in education from State. Miss Corbishly has been active in Spartan Women's Alumni of Greater Lansing and is currently on the organization's board of directors.

No announcement as to her successor has been made by Thomas Dutch, director of housing.

Home Ec Alumnae Hear of Many Roles

Today's homemaker is many things.

That was one of the topics for consideration at the annual College of Home Economics Alumnae Day.

Miss Margaret B. Doughty, director of consumer education for Dow Chemical Company, Midland, spoke about the homemaker and her many roles. Miss Doughty is a graduate of M.S.U. and later obtained her master's degree at Iowa State College.

The women also heard addresses by Dr. Thelma Porter, dean of the College of Home Economics, and Miss Faye Kinder, associate professor of foods and nutrition.

State Man Named To Midwest U. Group

Dr. Laurence L. Quill, professor and head of the chemistry department at the University, is vice president of the newly formed Associated Midwest Universities. The latter is a nonprofit corporation, with headquarters at Argonne National Laboratory's main site near Lemont, Illinois. Dr. James H. Jensen, provost, Iowa State College, is president.

The new organization replaces the "Council of Participating Institutions," which, for some years, has included universities working with the Argonne Laboratory.

Splash Czars Gather

The NCAA swimming rules committee held its annual meeting this year at State's Kellogg Center.

The 1958 NCAA championships were awarded by the committee and a number of important rule change proposals were considered.

Two Soil Science Veterans Honored

Prof. J. O. Veatch and Dr. G. J.

Prof. Veatch

Bouyoucos, distinguished retirees of the soil science department at the University, were honored at a seminar by members and friends of the department. They performed 75 years of outstanding service to M.S.U. and made important contributions to the areas of soil genesis and classification and soil physics.

Prof. Veatch was presented with a copy of a newly published book written by his former student, Dr. Roy L. Donahue of Kansas State College. The book is dedicated to Prof. Veatch for his inspiration and leadership.

Dr. Bouyoucos

Dr. Bouyoucos rendered 46 years of professional service to M.S.U. which is longer than that of any other individual in the history of the University. He is world famous for his investigations with soil-water relationships and rapid methods of making mechanical analyses. He was presented a meritorious service plaque by his colleagues.

Michigan State to Play Southern Cal.

A home-and-home football series between Southern California and Michigan State in 1963 and 1964 was announced jointly by Jess Hill and Biggie Munn, athletic directors at Southern California and State.

The games are the first ever scheduled between the two schools.

The first contest will be played Oct. 5, 1963, in the Los Angeles Coliseum, home field of the Trojans. The second will be staged in State's Spartan Stadium on Oct. 3, 1964.

Sanitarians Named

Two M.S.U. faculty members were elected to offices of the Michigan Association of Sanitarians for 1958-59, at their educational conference at Kellogg Center. Frank Peabody, '42, is recording secretary and O. W. Kaufmann is a member of the board of directors.

Dr. Timmons to Aid Philippines Project

Dr. Guy E. Timmons, on sabbatical leave from the University's department of teacher education, will spend a year in the Philippines on a technical assistance project for Stanford University.

He and his family left earlier in the summer for the Philippines where he will represent Stanford as a team leader of a group of specialists participating in a Stanford-sponsored International Cooperation Administration project.

The primary purpose of the project is to assist in the upgrading of higher education and the improvement of teacher training in the Philippines.

Dr. Timmons and his family will reside on the campus of Central Luzon Agricultural College, Munoz, Nueva Ecija. He will return to his faculty assignment at M.S.U. in June, 1959.

Dr. Timmons served in the Philippines during World War II, was with the forces that made initial landings and as commander of an engineer battalion was one of the first to enter and help liberate Manila.

Among Ourselves

(Continued)

Mr. Church is typical of the folks who come to see us; typical, that is, from the viewpoint of being interesting. Not everyone, of course, is a missionary (or wants to be one) to central Africa.

Another notable fact about Mr. Church is that he is as nearly selfless as a man can be. We, in the constant race for existence, wonder, when we meet dedicated people, why they devote themselves so unselfishly to their duties, when those duties so frequently carry no tangible reward. Tangible to us, that is.

In other words, we asked him, "What's in it for you?"

"Nothing," he replied, "other than the deep satisfaction of knowing that we are benefiting a great number of people. We are aiding them toward a better living, improving their health and morals and lifting them to a higher station in the scheme of things. That is our only reward."

A refreshing response to hear. Yes, our alums are the kind of people we enjoy meeting and talking with. Won't YOU come see us sometime? Or write us a letter, telling about yourself? It might make an excellent magazine feature article.

Spartan Sport Slants

Football

The biggest rebuilding job in recent years faces Michigan State football coach Duffy Daugherty and his staff this fall as they put a 75-man squad through the paces in pre-season drills.

Gone are 21 lettermen, at least a dozen of whom were key figures in three consecutive brilliant seasons, a period when State won 24 games and lost only four. Their last year saw them win eight of nine games, missing an undefeated season by seven points, losing to Purdue, 20-13.

This stellar bunch, which led veteran Spartan observers to call it "the best single class group of football players in Michigan State history," included two consensus All-Americans in center Dan Currie and right halfback Walt Kowalczyk, and four All-Big Ten selections in Currie, Kowalczyk, quarterback Jim Ninowski and tackle Pat Burke.

Add to this list the loss of Blanche Martin, brilliant fullback, who will be out of action because of a knee injury suffered in the Old Timers' Game this spring. He was the pacesetter of the Spartan backfield after being moved to fullback in spring practice.

In all, State must replace five lettermen ends, six lettermen tackles, the top two centers and all of the starting backfield.

But Coach Daugherty and his aides are not too unhappy.

"We're not pessimistic, just realistic," says Daugherty. "We expect to have a good football team, but we have more problems than with any other Spartan team since I've been here. The tremendous spirit and enthusiasm displayed all through spring practice should go a long way toward overcoming the lack of experience at some positions on the squad."

Among Spartan assets are these:

1. The presence of a solid core of experienced players of proven quality, fellows whom Duffy likes to refer to as "pacesetters."

They include Capt. Sammy Williams, end, whom many observers termed the Big Ten's best football player last fall; big and mobile Fran O'Brien, tackle; rugged and quick Ellison Kelly, guard, and lightning fast Art Johnson, right halfback. There are a couple of sleepers, too, in junior left halfback Dean Look, and junior Bob Bercich, who was at left half in the spring but probably will go back to fullback because of Martin's loss. Some others who'll be of great help are John Middleton, guard;

Captain of the 1958 football squad and foremost Spartan All-American candidate is end Sammy Williams, 6-4, 220-pound senior from Dansville.

Palmer Pyle, tackle; Roger Donnahoo, right halfback; Don Arend, fullback, and Mike Panitch, quarterback.

2. Good squad speed. Speed and quickness have been hallmarks of all successful Spartan teams, and this one should be up to par with such swifties as Johnson, Look, Arend, Bercich and Panitch leading the way.

3. A strong running attack, mounted by Johnson, Bercich, Look, Arend, et al.

4. The presence of some highly promising sophomores. They include ends Fred Arbanas and Jason Harness, guards Mickey Walker and Fred Boylen, quarterbacks Ike Grimsley and Tom Wilson, left halfback Herb

Adderley, and fullback Danny Ane.

Trouble spots likely will be these:

1. Lack of experienced depth. The first eleven appeared solid in spring training, but behind it the drop-off in performance was quite noticeable.

2. Questionable passing attack. The loss of six lettermen ends and the key passer, Ninowski, from last year's team, can't be laughed off. Passing accounted for 1,088 yards gained and eight touchdowns scored last fall. Judging from spring practice results, this team won't match that record.

Athlete Grades

Michigan State varsity athletes are superior academically to their non-athletic brethren and do their best class room work during the terms in which their respective sports are in season.

These are two key findings in a recently completed survey of student grades by Michigan State's registrar's office.

The athletes in 14 varsity sports last school year were found to have a 2.45 academic average, compared to the 2.24 All-University male average. Under the Michigan State grading system, a 2.00 is a C average, a 3.00 is B, and a 4.00 is A.

Also, every single one of the 14 sports produced academic performances by its participants superior to the All-University male average. Tops was tennis with a 2.89. Basketball was 2.56, baseball 2.43, soccer 2.64, track 2.56, swimming 2.62, football 2.34, hockey 2.32, for some additional examples.

As to comparative performances of athletes in their studies when busy or unoccupied with their sports, the report listed a number of term average comparisons. In all but one of the cases cited the averages were up during the competitive seasons. For example, basketball players combined for a 2.50 average fall term and a 2.56 last winter. Golfers did 2.21 last winter but 2.27 in the spring, and hockey did 2.31 in the fall and 2.32 in the winter. The lone exception was wrestling, which produced 2.40 last fall, compared to 2.32 last winter.

A check of athletes' grades for last spring term alone shows football star Blanche Martin topping all performers with a straight A average. The junior fullback from River Rouge was one of 40 Spartans to compile a grade point average of B or better. Football led in the number of students with a 3.00 average or better with 11 in that group.

Bridging the Gap

A formidable chasm separates the confident high school senior and the humble university freshman

A university is heir to young people from thousands of high schools and tens of thousands of homes. As such it can control neither the past achievements nor the abilities of its entering freshmen, who represent the main endowment of higher education.

But these same freshmen are finding it increasingly difficult to overcome the obstacles in their evolution to the university.

It has been predicted, to cite one problem, that college enrollment applications will double by 1970. There is no certainty that there will be facilities to handle the increase.

Thus the signs indicate stiffer competition for a place in the nation's colleges and universities. Early and thorough preparation will become more important in bridging the gap to higher learning—academically and socially. As one expert puts the high school senior's problem of transition:

"From the confident success of his senior year in a secondary school, culminating in the glory of his graduation exercises, he now faces as a humble freshman a set of new and difficult problems."

Alumni of Michigan State are among the parents who will someday see their children face the problems of a shift from high school to college.

To prepare for the future, reliance should first be placed strongly on the three R's. That's part of the advice from Michigan State's counseling experts, who yearly advise nearly half the University's student body.

"Reading, writing and figuring are still the essential elements in academic success," says Dr. Rowland R. Pierson, associate professor at the Counseling

Center. Dr. Pierson is also acting head of Michigan State's summer counseling clinic for freshmen while Dr. Thomas A. Goodrich is on sabbatical leave.

The clinic and Counseling Center are two methods by which the University helps narrow the space between high school and college.

Dr. Pierson explains that in American education there is a definite break between secondary school and college. There is no solid continuity of either subject matter or social life in the two areas.

"In most respects colleges and universities set the pace for high schools with selective admission procedures," he says. "Although those deemed most likely to succeed are admitted, many go to college with undetected weaknesses."

"Early preparation can help a student avoid a low level of college work and the failure to realize his potential. No matter what is done in other high school work, if a student has done well in reading, writing, mathematics and science the chances are good that he will succeed in college."

Discovery of how he actually compares with college freshmen is one of the first insights a student needs if he is bent on a successful transition to higher education.

"All high school students intending to enter college should get a test of comparison with college freshmen," Dr. Pierson asserts. "There is a standardized test of academic ability given at many high schools. It will reflect the student's abilities in terms of how he matches with other college freshmen. The test can give clues to weak

These high school graduates are mid-way in the crucial transition to college. They are taking freshman orientation tests which will help determine their abilities and be a guide to themselves and counselors before and after enrollment.

spots that might mean later failure."

The college norm tests are not based on the performance of other high school students. This is important.

"A student may rank near the top at his high school," Dr. Pierson explains, "but a test comparing him with his classmates would only show how he compares with them, not his college competition."

After learning the results of the tests, a student can bear down to improve himself in weak areas. If a student is in college before discovering serious shortcomings he might spend a large part of his first year in non-credit courses, working to overcome weaknesses.

"Many good high schools offer remedial courses," Dr. Pierson says. "A student could take advantage of them and also work during his spare time to improve his abilities before moving on to college."

In addition to academic matters, there are other causes for a student's not making the grade in moving from high school to college. He might have maladjustments involving ideals, interests or values. There might be economic or personality problems.

Through upsetting influences a student can be thrown off balance and have his grades fall.

Disastrous results, such as flunking out during the freshman year, can often stem from any one of numerous possible conditions in a student's pre-college environment, Dr. Pierson explains. Students come to college with many of the troubles for which the college is later blamed. An example can be found even in counseling.

"In high school many counselors have activities of an administrative nature," Dr. Pierson relates. "These duties tend to make students less than receptive to counseling when they get to college."

He explains that it is in the nature of most high school counseling tasks that time be devoted to administrative work. This is especially so where budgets do not provide for counselors on a full-time basis.

"A student's contact with a high school counselor may have involved reprimands for tardiness or other breaches of regulations," Dr. Pierson says. "It is more difficult for such a student to seek counseling assistance in college, although he might be in desperate need of help."

At Michigan State the opportunity for counseling is open before the student enrolls. This is through the freshman summer clinic, now in its tenth year of operation.

During their senior high school year, prospective freshmen are notified of the times when the clinic will be held. Approximately half of the

new class annually signs up for the three days of testing and counseling offered on campus.

Dr. Pierson says there have been better grades and fewer students on academic probation among participants in the summer clinic, thus reflecting its effectiveness in aiding transition.

He believes, however, that there is no set of circumstances which can guarantee success in college. Important background conditions range from general aptitude to parental interest in the student. Here are some pertinent elements with comments by Dr. Pierson:

Academic Standing in High School

"It is important to have good grades in high school, but secondary school performance is only part of the picture. Some students who did good work in high school in too many cases score low on the college norm tests. A serious problem of adjustment to realities can occur in these cases.

"Regardless of where he stands in high school a student should take the tests which show where he ranks in relation to college freshmen."

Extracurricular Activities and Responsibilities

"There's a difference between belonging to an extracurricular club and having responsibilities. Some leadership or responsibility is more important than merely belonging to an organization.

"The student also should have assigned responsibilities for various duties and affairs of his own at home. Even the prosaic matter of being able to set up and handle his own checking account is important. The student must have some ability at conducting his financial affairs."

Parental Attitude

"Parents should be understanding of the student's strengths and limitations. They should encourage their children but not be oversolicitous or demanding. There has to be discipline and direction by the parents, but we see a number of personal adjustment problems that go back to undue pressure and pushing by parents.

"The most glaring result can be student frustration and guilt feelings over failure to live up to unrealistic goals not set by the students. But based on our observations, parents do come to accept new goals decided on by their children once they know what the students really want and why they want it."

General Home Conditions

"Unsatisfactory home conditions are usually an added obstacle for a stu-

dent. He has to work harder. We spend many counseling hours with students who want to succeed but who are laboring under problems connected with their homes."

Deciding On An Occupation

"Having selected his future vocation will enable a student to plan his university program more efficiently, but we do not feel that there should be a stigma attached to not having a definite idea of goals. Many students find that their university experiences provide new insights into the world of work and into their own characteristics. As their values become clearer more definite career plans gradually emerge."

Consideration of the above points can help parents guide young students in the transition to higher education. Dr. Pierson comments on the following circumstances involved after a student has entered college:

Working to Pay Expenses

"The capable can do it. At Michigan State the rules permit a maximum of 20 hours part-time work a week. For the average or below average student we would discourage any part-time work during the first term and suggest only a limited amount the second and third terms."

Health

"We think of going to college as a full-time job. Good health is a must. Where there's any question about a student's physical condition he should plan a conservative program during his first year in college."

Living Off-Campus

"The rules at Michigan State require freshmen to live on the campus. After the first year it depends on the individual. If he is reasonably mature socially and doesn't need the adjustment facilities of dormitory life he might do very well in a private room."

In nearly all cases a student who survives the entrance requirements to college will have what it takes to succeed.

But Dr. Pierson asserts that admission to a university does not in itself mean that all students should approach their academic work in the same way. Because of individual differences some may proceed at an accelerated pace, while others should plan a conservative program.

"One of the best ways of assuring success at a university is to recognize academic strengths and limitations, then to make plans accordingly, for improvement of academic weaknesses usually is difficult until students are willing to accept them."

Covering

alumni activities

Alumnus Killed in Cuban Revolution

Political disturbances in distant lands are generally of but passing interest to alumni of State, but now and then they include tragedy that hits home.

Former students in school in 1952 will recall Morales Mustelier, a Cuban, who was enrolled in a special program dealing with soils. He was here on a scholarship, won in his native country the year previously.

He achieved outstanding prominence in Cuba following completion of his courses at State and eventually became chief laboratory engineer of the Bank of Agricultural and Industrial Development of Cuba.

On April 9, three months after being elevated to this position, he was killed, with two companions in reprisal for the general strike which had broken out over the island as a protest against the current regime.

In a letter to Clark Brody of State's Board of Agriculture, Dr. N. Silvia Diaz, of Santiago de Cuba, stated that Morales had been unjustly accused of belonging to a "communist element." He cited as proof that the accusation was unjust, the fact that Monsignor Serantes, archbishop of the island and other Cuban ecclesiastics invited the faithful to the funeral services which were held in the Cathedral Church of Santiago.

In his reply Mr. Brody expressed the University's deep regret over the tragedy and voiced the hope that the troubles that beset Cuba shortly may be resolved to the best interests of everyone in the island.

SHAFFHAUSER'S COLLEGE DRUGS

*Prescriptions
Drugs
Cosmetics
Fountain Service*

Abbott Rd. at E. Grand River

**Serving the entire
M.S.U. family**

— Club News —

Dickinson County

A picnic and election of officers highlighted the Club's meeting on June 22. The group discussed M.S.U.'s Honors College, a football excursion and membership. Ray Mariucci, '49, was re-elected president. Herman Berg, '56, was named vice president and Naome Rahm, '43, secretary.

Hillsdale

The Hillsdale Alumni Club held a chicken barbecue at the Conservation Rearing Ponds, June 25. Fifty persons attended; Frank Green, '49, presiding. Don Mason, '49, represented the alumni office.

Ingham

Karl McDonel, '16, M.S.U. secretary, was the special guest at the Ingham Alumni Club's annual golf outing. About 100 turned out for the day-long gathering. C. Earl Webb, '12, was meeting chairman.

Montcalm

A steak fry climaxed the Club's annual golf tournament in Greenville. Dale Stafford, w'30, was host for the fry. Dr. C. E. Stevens, w'46, won the tournament. W. Lowell Treaster, director of M.S.U.'s information services, was a special guest.

Oakland

Bill Flemming, Detroit sports announcer, was toastmaster for the Club's spring meeting. Held at the Plum Hollow Golf Club, members heard short speeches by "Biggie" Munn, Duffy Daugherty, Forddy Anderson, Ward Ouradnik and Don Mason.

Officers for 1958-59 are: Harry Winston, '51, president; Don Borgeason, w'49 and Dick Forbush, '51, vice presidents; Bevan Allen, '52, treasurer; and Shirley Meadowcroft, '53 and Betty Rex, '49, secretaries.

North Ottawa

Alumni from Ottawa, Kent and Muskegon counties gathered for a day of golf, dinner and dancing. John Kobs, M.S.U. baseball coach, and Don Mason, '49, assistant alumni director, were present at the meeting.

Central Indiana

Officers were elected at the June 28 meeting in Indianapolis. Elected were R. A. Dault, '50, president; F. C. Hicks, '57, and R. F. Kershaw, '42, vice presidents; H. Fisher, '48 and Mrs. R. F. Kershaw, w'45, secretaries and P. D. McQuillen, '50, treasurer.

Cleveland, Ohio

The Cleveland Alumni Club met May 21 in the Statler Hotel, George Colley, '52, presiding. Guests at the meeting were Starr Keesler, '41, Fordy Anderson and John Wilson, '52, assistant to the vice president for academic affairs.

Milwaukee, Wisconsin

Members of the Milwaukee Club met at the home of Mrs. Mary Mason. Sixty persons attended the dinner.

SPARTY SPOTLIGHTS

The job of directing the nation's biggest and busiest consulting engineering firm is in the hands of an outstanding Michigan State alumnus. Dr. William F. Uhl, '02, as chairman of the board of directors, heads Charles T. Main, Inc., internationally famous for its accomplishments in the field of engineering.

Presently Dr. Uhl is helping the Main company set new records as it rushes completion of the vast St. Lawrence and Niagara power plants—two of the biggest hydro-electric projects ever undertaken.

Dr. Uhl was graduated from Michigan Agricultural College more than a half-century ago and has been with the Main firm for all but 16 of its 65 years. Officers of Charles T. Main, Inc. say of its senior member, "His unselfish vigor and enthusiasm have played a significant role in making the company as successful as it is today."

William F. Uhl

The 77-year-old construction and hydro-electric power plant design specialist is in charge of a company staffed by 1,000 men that has built nearly everything that ever appeared on a drafting board. The Charles T. Main firm has undertaken, since its beginning in 1893, no less than 50 different projects ranging from construction of nuclear reactors to highways, bridges and industrial plants of all kinds.

Dr. Uhl's accomplishments have not gone unrecognized. Aside from the rapid promotion he has enjoyed within the Main company, "Billy" (a nickname used by his closest friends) also has received national recognition for his ability as a designer, author and industrial leader.

In 1955, M.S.U. presented him the Alumni Award for Distinguished Service. Tufts University granted Dr. Uhl an honorary Doctor of Engineering degree 10 years ago. Last June, at his alma mater's 98th annual commencement, he was again the recipient of the honorary engineering degree.

A career in engineering began for the 21-year-old graduate of M.A.C. in the fall of 1902 when he started to work for the Platt Iron Works, Dayton, Ohio, as a designer. "Billy" stayed with the Ohio firm until 1904 when he became engineer in charge of the hydraulic department, Allis-Chalmers Co., Milwaukee.

He remained with the Allis-Chalmers firm for five years and then joined the Charles T. Main company. This is his fiftieth year with the firm that makes its home in Boston, Mass. And his duties are not limited to those of chairman of the board.

Dr. Uhl also presides over an affiliated organization of Charles T. Main. Uhl, Hall and Rich, a partnership created as a result of a New York State law, handles engineering projects legally beyond the reach of corporations. The Main subsidiary employs nearly 300 field and office personnel. However, the corporation and the partnership have a common management and a common pool of engineering manpower.

Charles T. Main, Inc., primarily a consultant to private industry, is known throughout the world for its engineering ability. Under Dr. Uhl's leadership, the firm has completed projects in Europe and in the Middle East.

CHARLES B. HAYS, w'86, former mayor and businessman of Kalamazoo, Mich., died at his home in that city on May 31. In the real estate business for many years, Mr. Hays platted and developed several sections of the city, building over 1500 homes, a large hotel, two golf courses, and many miles of streets. Much of the credit of establishing the Kalamazoo Valley as a paper producing center is due to his pioneering efforts with the Bryant Paper Co., the Michigan Paper in Plainwell, and the Watervliet Paper Co. His courage and integrity in his business ventures and community work were evidenced by testimonial dinners in his honor in 1914 and 1942, and citations from the City Commission and the Rotary club. An ardent golfer for more than 60 years, he was named by Grantland Rice in 1942 as one of the three most remarkable competitive performers. He had competed in and won eight championships in the United States Seniors tournament by 1943, and participated in the game on local and other courses until the age of 93. He is survived by his wife, of 915 W. South St., Kalamazoo.

NELSON SLATER MAYO, '88, head of the export department of Abbott Laboratories in Chicago for many years, died in that city on July 5. Before joining Abbott Laboratories in 1913, Dr. Mayo had served on the faculties at Kansas State, University of Connecticut, Virginia Polytechnic Institute, and was vice-director of the Cuban Agricultural Experiment station and chief of the department of animal industry for Cuba. In recognition of his work, the nutritional laboratory in the veterinary college built in 1942 at the University of Habana was named for him, and in 1944 the University conferred upon him the degree of Professor Honoris Causa. He had previously received his M.S. from Michigan State and his D.V.S. from Chicago Veterinary College in 1889. He and Mrs. Mayo (Mary Lucy Carpenter, '88) made their home in Highland Park, Ill., and wintered in Mt. Dora, Fla. Mrs. Mayo died in 1955. Their three children survive.

THORN SMITH, '95, a chemist in the Detroit area from 1909 until his retirement in 1931, died at his home in Birmingham on May 31. Mr. Smith was employed at Grasselli Chemical in Cleveland, Ohio, and Ducktown Sulphur Copper and Iron in Isabella, Tenn., and in the experiment stations at Michigan State and Idaho, before opening his business of selling analyzed materials to chemical departments of universities. He retired in

Deaths

1931 and his son, Rossman W., '30, continued the work. Other survivors are his wife, the former Mertie Underwood, w'00, of 412 Williamsbury, Birmingham, and two daughters, Katherine Smith Thompson, w'27, and Dorothy Smith Rouse, '36.

ROY LEE BROWN, '01, for many years owner of the Brown Ice Cream Co. in Dallas, Texas, died March 1 in Irving, Texas, where he lived at 417 N. Delaware.

RALPH MEEKS LICKLEY, '01, former director of Farmers Mutual Fire Insurance Co. of Hillsdale county, died at his home in Pittsford, Mich., on May 18. Mr. Lickley was a mechanical engineer with the Talmadge Manufacturing Co. in Cleveland before returning to his homestead farm in 1920. He was active in church and Masonic groups, and had served his community as Justice of the Peace for many years. He is survived by his wife, the former Kate Nichols, w'00, who is now making her home with their daughter, Barbara, w'34, now Mrs. Norman Reeder of R. 1, Grand Ledge, Mich.

H. RAY KINGSLEY, w'03, structural engineer of buildings in many parts of the world, died in Chicago on Feb. 25. Mr. Kingsley was chief building engineer for the Philippine government for a number of years, and during World War I commanded the U. S. Army 3rd Engineers in the building of underground bombproof tunnels on Corregidor which were used by General MacArthur in the early months of World War II. Mr. Kingsley served in France with the ambulance corps before the entry of the United States into World War I. He was chief building engineer for the George Fuller Construction Company in Tokyo at the time of the devastating earthquake in 1923. Perhaps his crowning achievement was his work on plans in 1947 for the United Nations building in New York City, after which he wrote: "Now I am content to take life easy and watch the younger men build for our country." Mr. Kingsley was a member of many civil, military, engineering, and fraternal organizations and had traveled over much of the world. Mrs. Kingsley, the former Mabel Downey, w'05, died in 1952. They are survived by three children, six grandchildren, and Mr. Kingsley's brother, M. Leland, w'05, of Kendall, Mich.

EDWARD S. WHITNEY, w'03, for many years a teacher in the Detroit school system, and head of the science

department at Southeastern high school before his retirement in 1950, died April 16 in Port Sanilac, Mich., where he and Mrs. Whitney made their home.

GEORGE WILLIAM NICHOLS, '05, retired construction engineer, died in Orlando, Fla., June 21. Mr. Nichols was with Webb Engineering Co. in Pittsburgh before organizing his own firm which he headed for 25 years. Before his retirement in 1952 he was an engineer with George Vang & Co. in Pittsburgh. He and Mrs. Nichols (Mary Alice Butterfield, '05) who survives him, moved to Orlando in 1952 and lived at 919 Yates Ave. Also surviving are a son and three daughters, including Cecile Nichols McMichael, w'03.

RALPH T. STEVENS, '05, landscape architect in Santa Barbara, Calif., for many years, died in that city on Feb. 16. Mr. Stevens was assistant professor of landscape gardening and floriculture at the University of California at Berkeley before establishing his business in Santa Barbara. He was active in civic work and served as city park commissioner for 12 years.

JOHN ARTHUR BOICE, w'06, LL.D. (Mich.), attorney in Lansing more than four decades, died in that city on Feb. 2.

MYRTLE HAYWOOD McCLINTOCK, w'06, wife of Wayne B. McClintock and long-time resident of Marquette, Mich., died in that city on May 24.

HAAKON FURU, w'08, died at his farm home near Marshall, Mich., on March 23.

HUBER SHULL, '08, employed with the Grand Trunk railroad for over 20 years before his retirement in 1951, died at his home in East Lansing on June 11. Mr. Shull managed farms in Napanoch and Comstock, N.Y., and Elm Grove, W. Va., before returning to Michigan in 1922.

ALMA KENYON PIPER, w'09, died March 20 in Cumberland, Md., where she and her husband, William E. '07, who survives, had made their home since 1951.

BENJAMIN FRANKLIN KINDIG, '09, M.A. (Indiana) '33, owner and operator of the Kindig Nursery in Elkhart, Ind., since 1937, died at the National Institute of Health in Bethesda, Md., on June 9. Mr. Kindig was

instructor in beekeeping at Michigan State and had charge of apiary inspection in the State Department of Agriculture. In 1929 he moved to Indiana where he was superintendent or principal of school systems in Middlebury, Dunlap, and Shipshewana, before opening his nursery. He is survived by his wife, **Pauline Ulman Kindig** who did graduate work at Michigan State in 1927-28, a son, **Paul E.** '35, and two daughters.

PHILIP WARREN WILHELM, '13, veteran of both World Wars and for many years associated with the Goodyear Tire & Rubber Co., died April 16 in North Wilkesboro, N.C. He and Mrs. Wilhelm, who survives, were enroute from their winter home in Asheville to Alexandria Bay, N.Y., where they had lived since his retirement in 1946.

VALDEN L. AITKEN, w'14, superintendent of the irrigation district in Riverdale, Calif., for the past 25 years, died in Fresno on March 19. He is survived by his wife, son, and two daughters.

EUNICE ROSSER MUNN, w'14, wife of the late **Mancel T. Munn**, '12, died Jan. 25 in Arcadia, Calif., where they had made their home since 1953.

RALPH ELDRON DINAN, '15, veteran of World War I and with the U.S. Ordnance department for 14 years before his retirement in 1955, died in Detroit on April 16. He was active in Masonic circles and was past master of Northwestern Lodge No. 529. He is survived by his wife, of 13600 Santa Rosa Dr., Detroit, and daughter, **Marjorie Dinan Bouck**, w'41, of Falls Church, Va.

THOMAS BURDON DIMMICK, '16, M.S. (Mich) '17, formerly with the Michigan State Highway department, and highway economist with the Bureau of Public Roads in Washington for the past 20 years, died in that city on May 18. He was active in Masonic groups and a member of several Washington historical and numismatic societies. Mrs. Dimmick survives.

CHARLES HANS JOHNSON, '16, veteran of World War I and with the U. S. Forest service for many years, died at his home in Missoula, Mont., July 1. Mr. Johnson retired from government service in 1943 and had an investment business in Missoula the past few years. He is survived by his wife, two sons, and a daughter, all of Missoula, and his brother, **Ralph J.** '16, of Minneapolis.

JAMES ROWLAND QUINN, '16, long-time resident of the Detroit area, died in Birmingham, Mich., on April 2. Mrs. Quinn survives.

LEIGH MARCUS NASON, w'17, machinist and tool maker in the Detroit area for many years, and since 1952 a resident of Sherman Oaks, Calif., died May 11. He received his B.S. and M.S. degrees from Ohio State University. He is survived by a sister, **Maud Nason Powell**, '13, of Allenspark, Colo., and brother, **Leslie J.** '23, of Long Beach, Calif.

MRS. HARRY JOSHUA EUSTACE, who took special work with the class of 1918, died June 17, in Berkeley, Calif., where she and **Dr. Eustace**, '01, made their home at 179 Alvarado Rd.

HENRY NICHOLAS BOK, w'19, veteran of World War I and long-time employee of the International Harvester Co., died in Forest Grove, Mich., on April 9. He is survived by his wife, son, and three daughters.

WILLIAM TRUMAN GATES, w'19, World War I veteran and owner of the Gates Lumber Co. in Lansing, died in that city on May 4. He was active in Central Methodist church, Masonic organizations, and was a member of the Lansing park and cemetery board for nearly 10 years. He is survived by his wife, daughter, and son.

RODGER SHERMAN CLARK, '20, former engineer with the State Highway department, Allied Engineers, and Commonwealth Associates Inc., in Jackson, died March 17 in Fort Myers, Fla. He retired two years ago but continued to make his home in Jackson at 315 N. Grinnell St., spending the winter in Fla. Mr. Clark was enrolled in the last "prep" class and would have been graduated in 1918 had it not been for his service in World War I. He is survived by his wife, the former **Frances Iva Granger**, '18, son, **Richard W.** '51, both of Jackson, and daughter **Mary Catherine**, '43, of Pearl River, N.Y.

THOMAS STEWART BLAIR, '21, assistant manager of advertising and sales promotion for the J. B. Ford division of Wyandotte Chemicals for the past 35 years, died in Detroit on June 1. Mr. Blair worked for the California Fruit Growers Exchange before joining the Ford company in 1925. His wife and son survive.

JAMES PETER HOEKZEMA, '22, Berrien county agricultural agent, died in St. Joseph, Mich., on May 7. Mr. Hoekzema taught vocational agriculture in Three Rivers and Holly, and served as county agent in Lenawee and St. Joseph counties before joining the editorial staff of the Indiana Farmers Guide in 1946. He came to Ingham county in 1952 as county agent and transferred to Berrien in 1953. Last year, Mr. Hoekzema was one of three Michigan extension agents to receive distinguished service awards from the National Association of County Agricultural Agents. He is survived by his wife, two daughters, and son, **James K.** '48.

MARTHA STEWARD PHILLIPS, '23, wife of **George Robert Phillips**, '22, of 4612 Harrison, Washington, D.C., died in that city on April 19. She is survived by her husband and daughter.

BELFORD REEVES EWER, '26, lifelong resident of the St. Johns area, died in that community on May 16. He is survived by his wife, son, and two daughters.

JOHN EDWARD VANDERVEEN, '27, road contractor in Grand Rapids, Mich., for more than 30 years, died in that city on May 9. A partner in P. VanderVeen & Sons for many years, in June 1927 he formed the John E. VanderVeen Co., gravel suppliers and road contractors. He was active in numerous civic, church, and fraternal groups, and lived in Grand Rapids at 1038 Wren Ave. S.E. Surviving are his wife, son, four sisters and two brothers, including **Herman VanderVeen**, '29, also of Grand Rapids.

LEE H. COLES, '29, site manager in Seneca Falls, N.Y., for the Atomic Energy Commission, died in Geneva, N.Y., May 3. Mr. Coles entered the U.S. Corps of Engineers in 1931 and was engaged for many years in river, harbor and flood control work on the Great Lakes and the Mississippi and Arkansas rivers. In World War II he served in the army from 1941 to 1946 with the rank of major. He spent three years in Europe as command engineer for the Ninth Tactical Air Command. He was assigned to the AEC in 1953. Surviving are his wife, daughter and son.

CHESTER DYE SUPERNAU, w'29, president of the Lumberman's Wholesale Supply Inc. of Grand Rapids, Mich., died in that city on May 26. He was with the First Bank Credit

On East U.S. 16
In the Shadows of M.S.U.

Do You Remember

September, 1908

Twenty-three new instructors joined the M.A.C. faculty as the fall term began. . . . Enrollment reached 1,500, according to W. J. Wright, secretary to President Snyder. The record number of students made it necessary to split classes into as many as four sections. . . . College students were warned not to use chains or metal plugs on their car tires because they caused excessive damage to newly finished streets. . . . Coach Chester L. Brewer prepared his 1908 football squad for the season's opener against Flint.

September, 1933

The labor pay rate at M.S.C. was raised from 25 to 30 cents an hour, the State Board of Agriculture revealed. . . . Thirty-six new graduate assistants were appointed for the 1933-34 school year. . . . 50 men reported to Coach Bachman for football practice. The opening session was attended by 300 high school coaches who gathered to hear an interpretation of new rules by Dr. Huston, M.S.C. faculty athletic representative. . . . A young sophomore, Sid Wagner, was singled out as one of the most promising players on the Spartan squad. . . . Fall enrollment reached the 2,500 mark but did not match the 1932 total. . . . By popular demand the department of agriculture continued its farm exhibit on the second floor of the library. . . . A record-breaking crowd was expected to gather for the Spartan's opening game against Grinnell.

September, 1948

Russel G. Mawby, M.S.C. student, returned from a three-month visit to England as a participant in the department of agriculture's extension program. He told professors, "You have to admire the English. They've been cultivating the same land for 4,000 years and they still get good crop yields." . . . The largest crowd ever to see a game at M.S.C. jammed newly rebuilt Macklin Stadium to watch Michigan defeat the Spartans, 13-7. A throng of 51,511 was on hand for the opener of the '48 season. Dr. Hannah dedicated the enlarged stadium prior to the game. Fans cheered the performance of an unknown sophomore half-back, Everett "Sonny" Grandelius. . . . The State Board of Agriculture announced that 48 instructors had been added to the faculty. . . . Robert Linton, registrar, reported that enrollment was up over the 1952 mark. He expected 16,000 to register.

September, 1953

President Hannah announced there was no truth in the rumor that he had accepted the job of secretary of labor under President Eisenhower. . . . Professor Carl G. Card, head of the M.S.C. poultry husbandry department since 1924, revealed his retirement plans. . . . A record freshman enrollment was reported by the registrar's office. More than 4,000 frosh enrolled, swelling the total student body to 14,000. . . . M.S.C.'s Spartans entered Big 10 play for the first time against the State University of Iowa and defeated the Hawkeyes, 21-7. State, defending national champions, notched its 25th consecutive victory without defeat. A crowd of 48,000 excited Iowa fans watched Coach Biggie Munn direct the defeat of a former pupil, Forest Evashevski. The Spartan attack was led by Billy Wells, Evan Slonac, Earl Morrall, LeRoy Bolden and Gerry Planutis.

'34

Maurice J. Day has been named vice president of technology for the Crucible Steel Co. of America. Dr. Day received the Alumni Award for Distinguished Service in 1957. . . . Colonel Ralph L. Dickie is stationed in Turkey. His mailing address is TULOG, Det 13, No. 7, APO 224, New York, N.Y.

MEMO: To All Alumni ✓

Michigan State University through its Continuing Education Service provides opportunities for your continual development. Last year more than 500 credit and informal courses were offered throughout the state.

The Continuing Education regional offices at Benton Harbor, Grand Rapids, Marquette, Pontiac, Saginaw, and Traverse City are front doors to the resources of M.S.U. You are encouraged to knock on these "doors of opportunity" for help in continuing your education. For specific information about courses available in your area contact the regional office nearest you (See list below) or write to University Extension, Room 6, Kellogg Center, Michigan State University, East Lansing.
