Wesley R. Fishel
Chief Advisor

Agrarian Reform Project - Memorandum dated 19 September 1956

As you know from our reports we participated in a study of the administration of the Agrarian Reform in Japan and Taiwan. This was done prior to making our recommendations concerning the Department of Agriculture and the Department of Agrarian Reform and Land Estates.

We do not expect an immediate study mission but if anticipated changes in the top management occur in the Department we may consider further study in a third country. We appreciate your information concerning the Philippine experience and it will be used in future plans.
