		3. PROJECT TITLE AND SUB-TITLE THIS ACTIVITY Teacher Training and Higher Education Part II: Higher Education (FY-57)	

16. DESCRIPTION THIS ACTIVITY. RELATIONSHIP TO PERTINENT PROJECTS AND ACTIVITIES OF THE UN. USIA. ETC.

This project is designed to expand and improve the University of Saigon, the only operating institution of higher learning in Vietnam. Specifically, participant training under this project is designed to extend the professional horizons and increase the teaching competencies of key faculty members.

Ours is the only American agency working directly on this problem. Much attention is being given to related aspects by the French Government and some similar assistance is being given by the Colombo Plan countries. Our participation is critically needed, not only because of the fields of specialization in which training is needed.

(continued)

17. NAMES OF PARTICIPANTS. KINDS OF TRAINING NEEDED AND METHOD OF CARRYING OUT. RELATIVE EMPHASIS TO BE GIVEN VARIOUS PHASES. PROBLEMS IN COUNTRY OR INDUSTRY WHICH THIS TRAINING IS INTENDED TO SOLVE.

1. Mr. Tran Huu The, Instructor in Chemistry, University of Saigon

Kinds of Training Needed and Method of Carrying Out:

This participant has three major objectives: To study the organization and operation of science programs in the secondary schools; to study the organization and operation of faculties of science in one or two leading American universities, and to study the ALCOA Laboratory for Aluminum Research at Pittsburgh, Pennsylvania. For the first purpose it is suggested that the U.S. Office of Education plan a custom program of study and observation to meet his specific needs. Some help may also be secured from the A.A.A.S. Some time should be spent at an institution of the science caliber of M.I.T. or the California Institute of Technology. While in the New York area some observation might also be made of C.C.N.Y. which, as a municipal institution, shares several problems in common with the University of Saigon.

Problems in Country or Industry which this Training is intended to solve:

The University of Saigon has a good beginning in science education. If this country is going to make significant progress along the road to economic independence, the existing science program must be expanded and enriched. The proposed program of study is directly related to both educational and economic research needs.

(continued)

18. CONTEMPLATED PLANS FOR DISSEMINATION AND USE OF KNOWLEDGE GAINED. GIVE DETAILS.

The knowledge and insights gained will be applied to science education in Vietnam through the courses through which the participant teaches in the School of Science. It is further anticipated that he will share with his colleagues his newly gained knowledge from the United States.

19. WHAT REASONABLE ASSURANCE HAS BEEN GIVEN THE MISSION THAT THE APPLICANT(S) WILL, UPON COMPLETION OF THE VISIT RETURN TO THE POSITION HE LEFT, A SIMILAR POSITION, OR A SUPERIOR ONE IN THE SAME FIELD OF ACTIVITY?

This participant is presently serving as a regular member of the University Faculty. A prime basis for his selection for training in the U.S. was his demonstrated competence in instruction and research, and his and the University's desire to continue service on the faculty. In addition to his present faculty status this participant has a need a
