

LEGEND - (Danh mục)
This legend explains the symbols and colors used on the map to represent various geographical features and infrastructure. It includes symbols for roads, railways, rivers, and administrative boundaries, along with their corresponding names in Vietnamese and English.

Scale
The map is at a scale of 1:50,000. A scale bar is provided at the bottom, showing distances in meters and kilometers.

CONTOUR INTERVAL - 20 METERS
The map uses contour lines to show elevation. The interval between contour lines is 20 meters.

QUANTIFICATION OF DISTANCES
This section provides information on how distances are measured and represented on the map, including the use of the UTM coordinate system.

TO CONVERT A METRIC MEASUREMENT TO A U.S. MEASUREMENT
This section provides a table for converting metric measurements to U.S. measurements, including units for length, area, and volume.

TO CONVERT A U.S. MEASUREMENT TO A METRIC MEASUREMENT
This section provides a table for converting U.S. measurements to metric measurements, including units for length, area, and volume.

QUANTIFICATION OF DISTANCES
This section provides information on how distances are measured and represented on the map, including the use of the UTM coordinate system.

TO CONVERT A METRIC MEASUREMENT TO A U.S. MEASUREMENT
This section provides a table for converting metric measurements to U.S. measurements, including units for length, area, and volume.

TO CONVERT A U.S. MEASUREMENT TO A METRIC MEASUREMENT
This section provides a table for converting U.S. measurements to metric measurements, including units for length, area, and volume.

GLOSSARY - (Danh mục)
This section provides a list of terms and their meanings in both Vietnamese and English, covering various geographical and administrative terms.
